

Enhancing the Portfolio

August 2019

Advisories

This presentation contains forward-looking statements. All statements, other than statements of historical fact that address activities, events or developments that Frontera Energy Corporation (the “Company” or “Frontera”) believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding corporate strategy, dividend payments, estimates or assumptions in respect of production levels, operating EBITDA, capital expenditures, timing and potential impact of cost savings initiatives, drilling plans involving completion and testing and the anticipated timing thereof, revenue, costs, production costs, transportation costs, reserve and resource estimates, potential resources and reserves, and the Company's exploration and development plans and objectives) are forward-looking statements. These forward-looking statements reflect the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. Factors that could cause actual results or events to differ materially from current expectations include, among other things: uncertainty of estimates of capital and operating costs; production estimates and estimated economic return; failure to meet project timelines; uncertainties associated with estimating oil and natural gas reserves; failure to establish estimated resources or reserves; volatility in market prices for oil and natural gas; fluctuation in currency exchange rates; inflation; changes in equity markets; perceptions of the Company's prospects and the prospects of the oil and gas industry in Colombia and the other countries where the Company operates or has investments; the uncertainties involved in interpreting drilling results and other geological data; and the other risks disclosed under the heading “Risk Factors” in the Company's annual information form dated March 13, 2019 filed on SEDAR at www.sedar.com. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

This presentation contains future oriented financial information and financial outlook information (collectively, “FOFI”) (including, without limitation, statements regarding operating EBITDA, capital expenditures (including maintenance & development drillings, exploration activities, facilities & infrastructure and administrative and others, production costs, and transportation costs for the Company in 2019), and are subject to the same assumptions, risk factors, limitations and qualifications as set forth in the above paragraph. The FOFI has been prepared by management to provide an outlook of the Company's activities and results, and such information may not be appropriate for other purposes. The Company and management believe that the FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments, however, actual results of operations of the Company and the resulting financial results may vary from the amounts set forth herein. Any FOFI speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any FOFI, whether as a result of new information, future events or results or otherwise. The Company discloses several financial measures in this presentation that do not have any standardized meaning prescribed under International Financial Reporting Standards (“IFRS”) (including Operating EBITDA). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. For more information, please see the Company's management's discussion and analysis dated March 13, 2019 for the year ended December 31, 2018 filed on SEDAR at www.sedar.com.

All reserves estimates contained in this presentation were prepared in accordance with the definitions, standards and procedures contained in the Canadian Oil and Gas Evaluation Handbook and National Instrument 51-101 – Standards of Disclosure for Oil and Gas Activities (“NI 51-101”) and included in form 51-101F1 – Statement of Reserves Data and Other Oil and Gas Information filed on SEDAR. Additional reserves information as required under NI 51-101 can also be found on SEDAR, under the: (i) Forms 51-101F2 – Report on Reserves Data by Independent Qualified Reserves Evaluator completed by each of DeGolyer and MacNaughton on February 26, 2019; and (ii) Form 51-101F3 – Report of Management and Directors on Oil and Gas Disclosure dated March 13, 2019. All reserves presented are based on forecast pricing and estimated costs effective December 31, 2018 as determined by the Company's independent reserves evaluators. The Company's net reserves after royalties incorporate all applicable royalties under Colombia and Peru fiscal legislation based on forecast pricing and production rates, including any additional participation interest related to the price of oil applicable to certain Colombian blocks, as at December 31, 2018. Contingent resources are those quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations using established technology or technology under development, but which are not currently considered to be commercially recoverable due to one or more contingencies. Contingent Resources have an associated chance of development (economic, regulatory, market and facility, corporate commitment or political risks). The estimates herein have not been risked for the chance of development. There is no certainty that the contingent resources will be developed and, if they are developed, there is no certainty as to the timing of such development or that it will be commercially viable to produce any portion of the contingent resources. It is not an estimate of volumes that may be recovered. Actual recovery is likely to be less and may be substantially less or zero.

Resources do not constitute, and should not be confused with, reserves. “Internal estimate” means an estimate that is derived by Frontera's internal engineers and geologists. Internal estimates should be considered preliminary until analyzed and certified by third party reserves evaluators. As a result, readers are cautioned not to place undue reliance on such estimates.

The term “boe” is used in this news release. Boe may be misleading, particularly if used in isolation. A boe conversion ratio of cubic feet to barrels is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. In this news release, boe has been expressed using the Colombian conversion standard of 5.7 Mcf: 1 bbl required by the Colombian Ministry of Mines and Energy.

In addition, reported production levels may not be reflective of sustainable production rates and future production rates may differ materially from the production rates reflected in this presentation due to, among other factors, difficulties or interruptions encountered during the production of hydrocarbons.

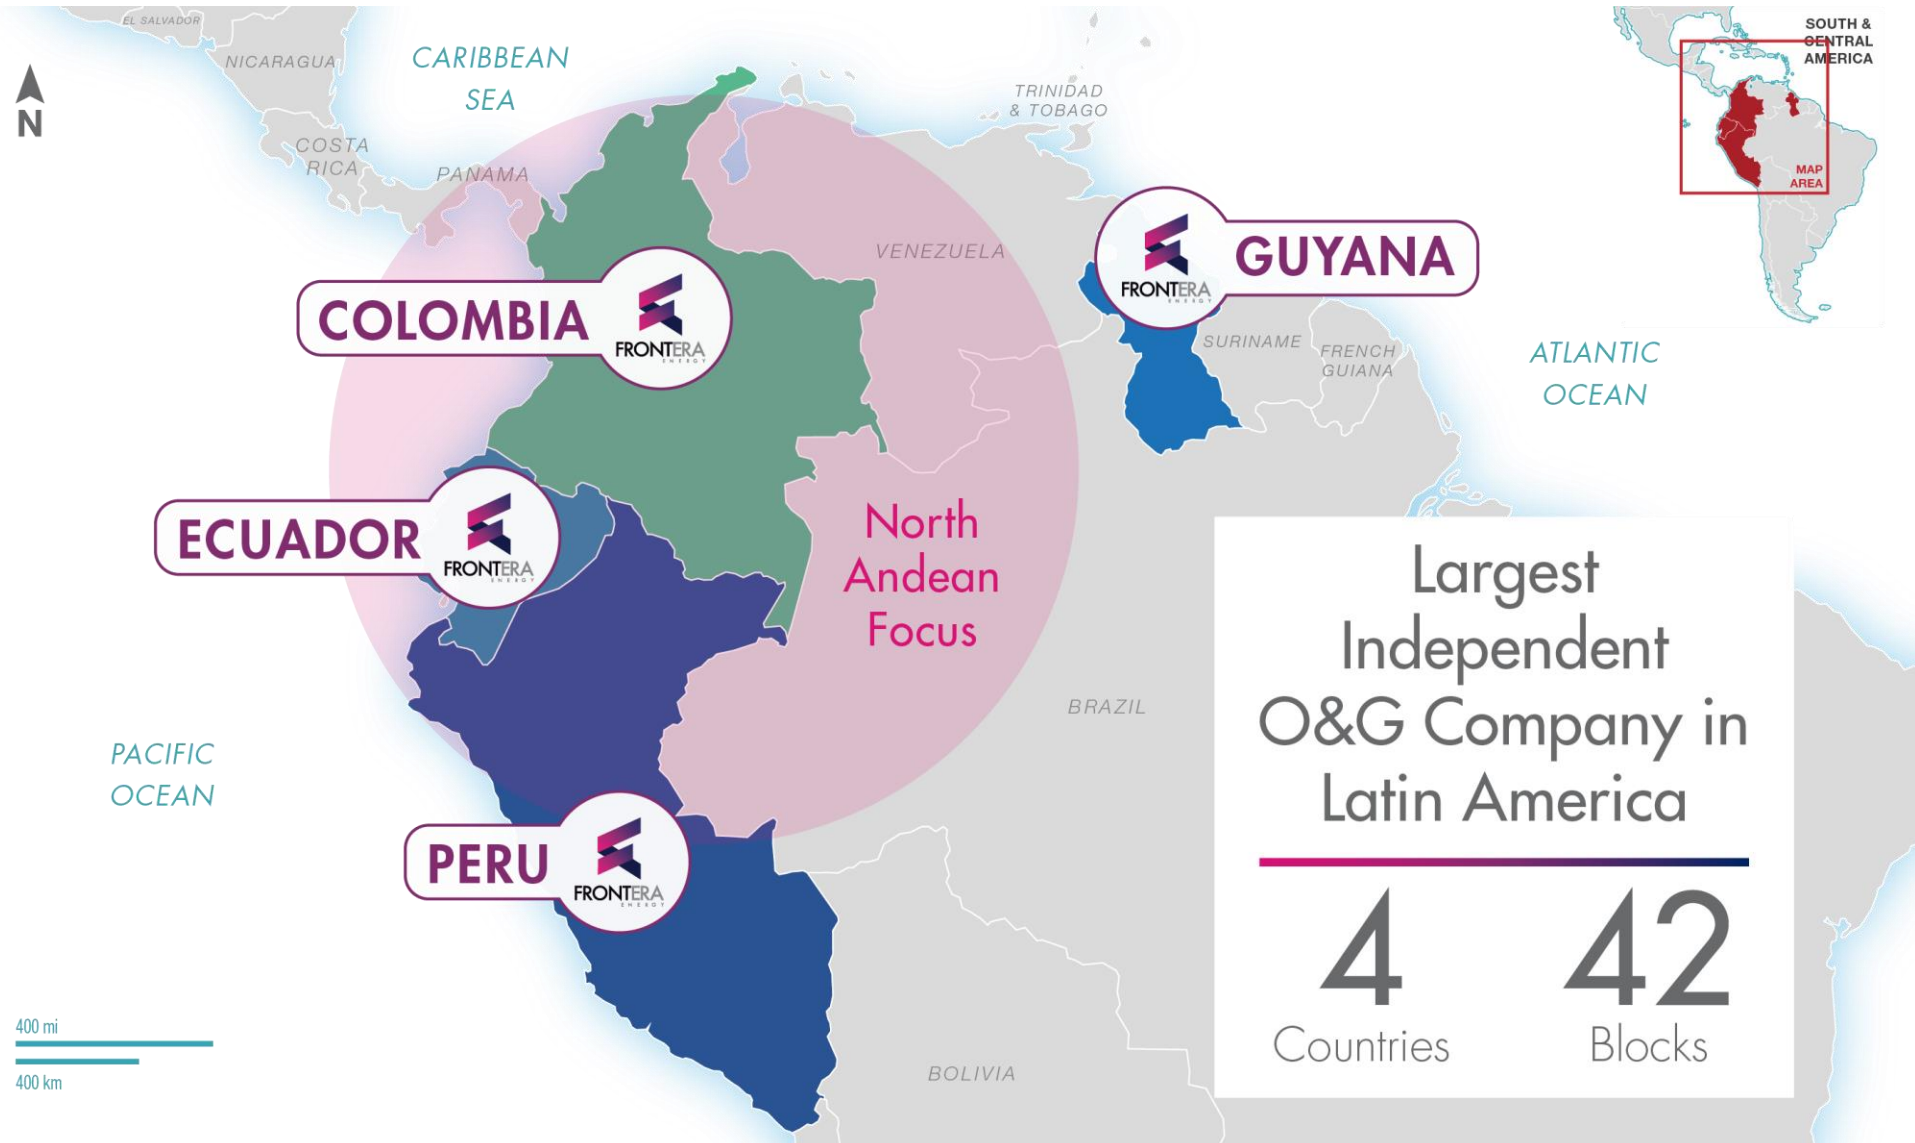

The values in this presentation are expressed in United States dollars and all production volumes are expressed before royalties, unless otherwise stated. Some figures presented are rounded and data in tables may not add due to rounding.

Company Overview

Frontera Energy

North Andean Focus

Frontera Energy

Company Snapshot

Capital Structure (\$U.S.)⁽¹⁾

Shares Outstanding (TSX: FEC; MM)	98
Market Cap (\$MM) ⁽²⁾	\$1,051
Total Cash ⁽³⁾ / Cash and Cash Equivalents (\$MM)	\$486 / \$354
Long-Term Debt (\$MM Face Value/Markets) ⁽⁴⁾	\$350 / \$374
Enterprise Value (\$MM) ⁽²⁾⁽⁵⁾	\$1,138

Reserves (Dec. 31, 2018)⁽⁶⁾

Proved (1P; MMBoe)	116
Probable (MMBoe)	55
Proved + Probable (2P; MMBoe)	171
PDP NPV10 After Tax	\$731
1P NPV10 After Tax	\$1,428
2P NPV10 After Tax	\$2,206

Strong balance sheet provides opportunities for enhanced shareholder returns

Targeted quarterly dividend of \$15 million with \$40 million special dividend and 5% NCIB

Longer term growth investment opportunities in Colombia, Guyana, Ecuador, and Peru

Q2 2019 Production Mix

2018 Net 2P Reserves⁽⁶⁾

(1) Shares outstanding, cash and cash equivalents, long-term debt and non-controlling interests as at June 30, 2019.

(2) Assumes Frontera share price of CAD\$14.00 and USD/CAD exchange rate of 1.305.

(3) Total cash balance includes current restricted cash \$38 MM and non-current restricted cash \$93 MM.

(4) \$350 million senior unsecured notes due 2023 are rate BB- by S&P and BB-/RR4 by Fitch, July 2019 market price \$107.0.

(5) Enterprise value is calculated as the market capitalization plus long-term debt, minority interest (\$66 MM), minus total unrestricted cash and cash equivalents.

(6) Reserves report was prepared by DeGolyer and MacNaughton ("D&M"), POP reserves of 39 MMBoe before royalties.

2019 Revised Guidance

Strong EBITDA, Stable Capex, Lower Costs

		2019 Guidance	2019 Year To Date	Revised 2019
Operating EBITDA	(MM)	\$400 to \$450	\$326	\$525 to \$575
Capital Expenditures	(MM)	\$325 to \$375	\$143	\$325 to \$375
Average Daily Production	(boe/d)	65,000 to 70,000	71,197	65,000 to 70,000
Production Costs ⁽¹⁾	(\$/boe)	\$12.50 to \$13.50	\$11.28	\$12.00 to \$12.50
Transportation Costs ⁽²⁾	(\$/boe)	\$12.50 to \$13.50	\$12.59	\$12.50 to \$13.50
Brent Oil Price Assumption	(\$/bbl)	\$65.00	\$66.17	\$65.00
Oil Price Differential	(\$/bbl)	\$8.40	\$2.73	\$3.50
Foreign Exchange Rate	(COP:USD)	3,000:1	3,187:1	3,100:1

(1) Calculated using production before royalties as this most accurately reflects per unit production costs.

(2) Calculated using production after royalties as this most accurately reflects per unit transportation costs.

2019 EBITDA Sensitivities

Using 2019 Revised Guidance Estimates of \$65.00/bbl Brent, 3,100:1 USDCOP, Differential of \$3.50/bbl Generates \$525 - \$575 MM in Annual EBITDA

Production Cost (\$/bbl)	+\$1.0	(26)	26	(\$1.0)
Transport Cost (\$/bbl)	+1.0	(23)	23	(\$1.0)
Impact of Differentials (\$/bbl)	+1.0	(21)	21	(\$1.0)
Brent Oil (\$/bbl)	(\$1)	(17)	17	+\$1
FX Rate USD/COP ⁽¹⁾	(100)	(13)	13	+100
General & Administrative Costs (\$/bbl)	+0.5	(13)	13	(\$0.5)
Production (Boe/d before royalties)	(1,000)	(11)	11	+1,000

(1) FX rate sensitivity also impacts capex by \$6 million for each 100 COP/USD move

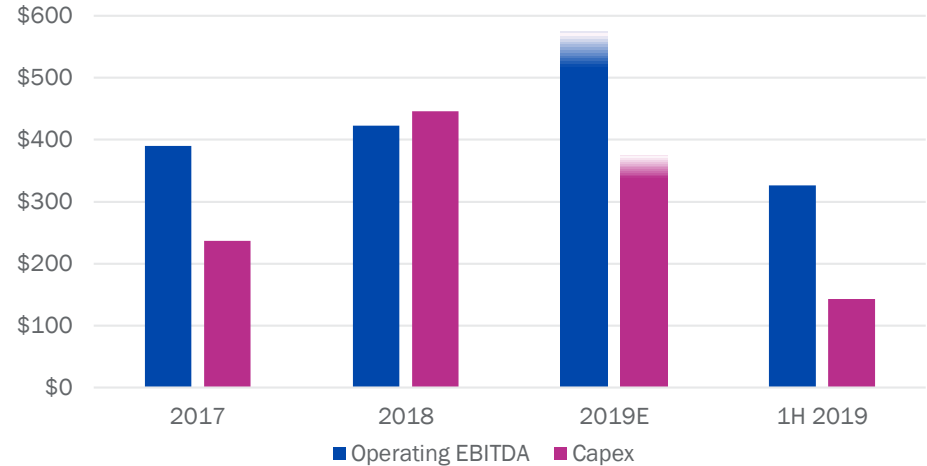

2019 Guidance

Strong EBITDA, Lower Capex, Lower Costs

Enhance Shareholder Returns⁽¹⁾
(5% NCIB and quarterly dividend of
\$15 million⁽²⁾)

Potential to Add New Barrels Through

- Exploration success in Guyana and Colombia
- Ecuador and Colombia Bid Rounds
- New Contracts in Peru and Colombia
- Additional farm-in opportunities

Continued Focus on Operational Efficiencies
to Deliver Lower Costs

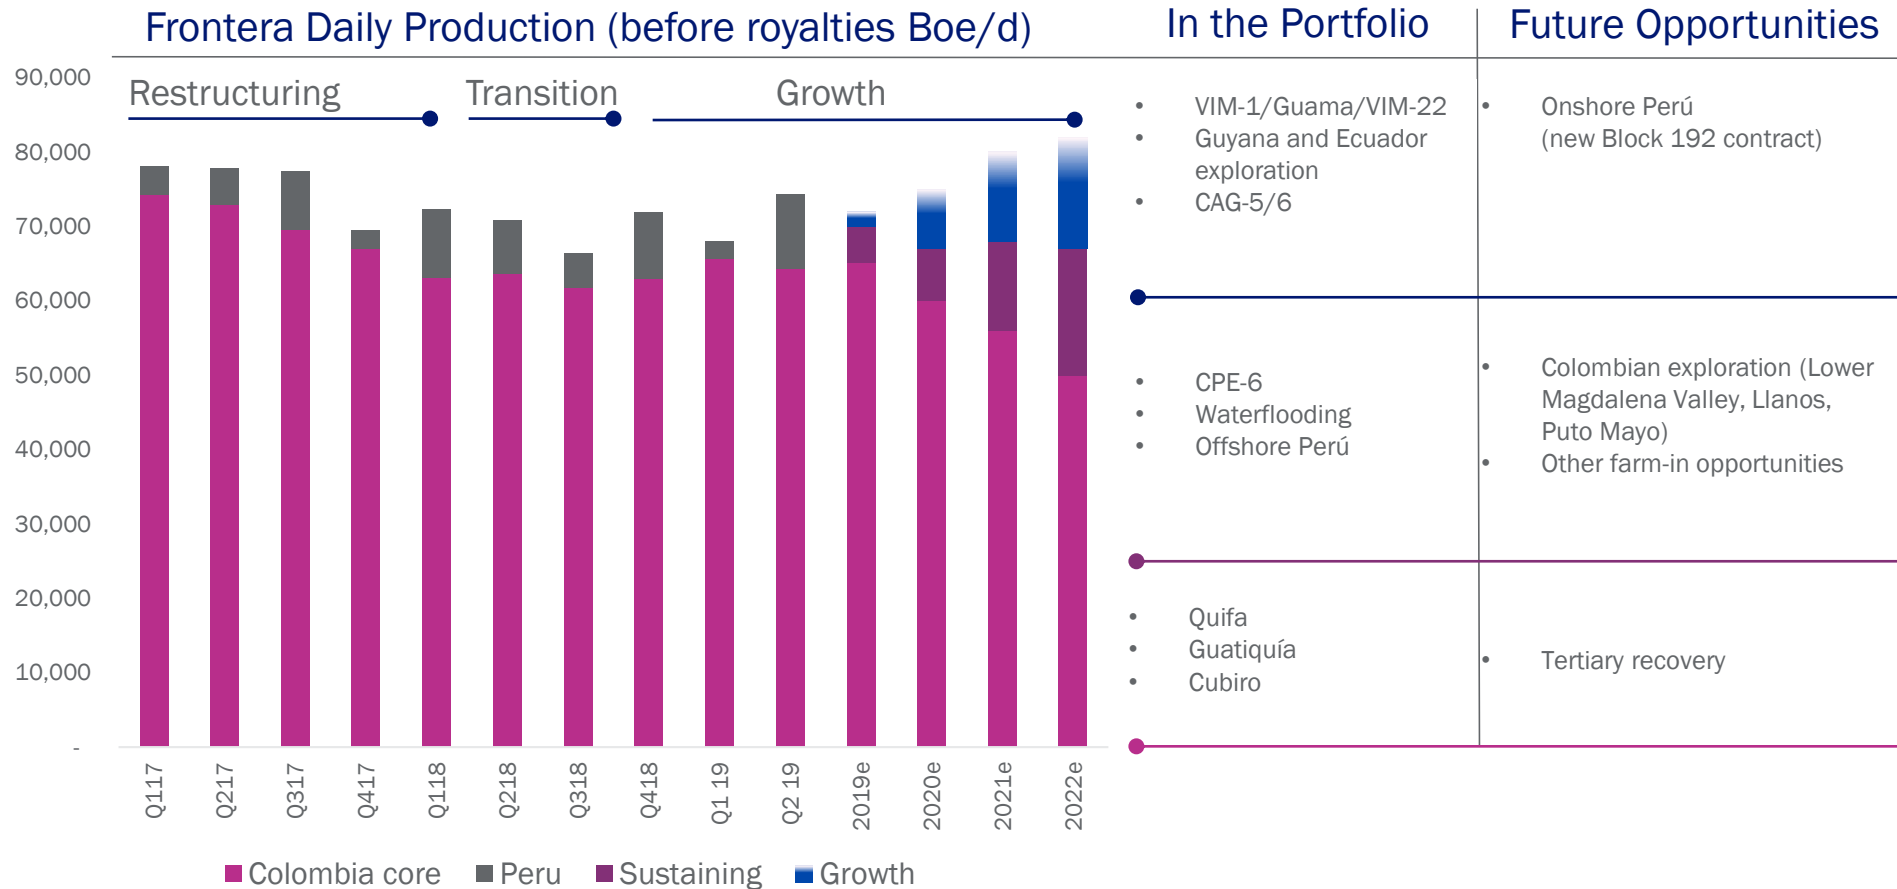

Realizing Value from Non-Core Assets

(1) Dividend Policy is to pay \$15MM per quarter when Brent averages above \$60/bbl. The declaration of any specific dividend, the actual amount, declaration date and the payment of each quarterly dividend will be subject to the discretion of the Company's Board of Directors.

(2) The Company's Normal Course Issuer Bid ("NCIB") expired on July 17, 2019. The Company anticipates that it will renew the NCIB. Any renewal would be subject to approval of the Company's Board of Directors and the Toronto Stock Exchange.

Core Assets Deliver Stable Base Production

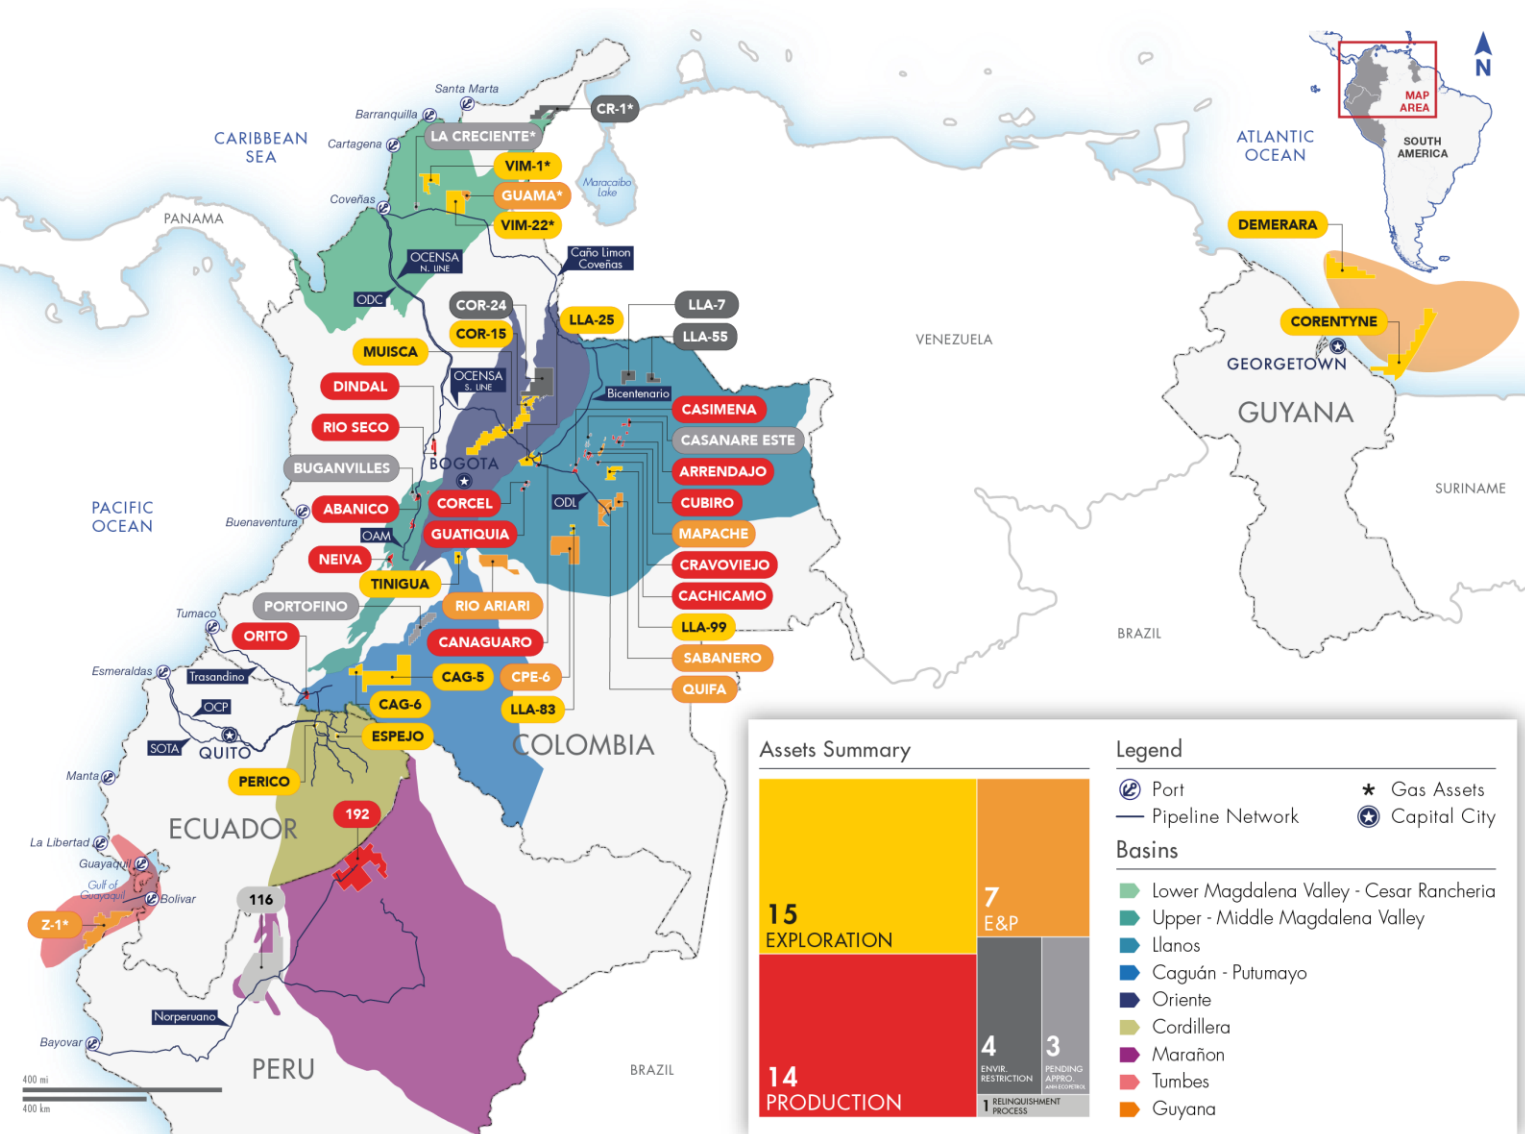

Seven Year Production Profile from Restructuring to Growth

Balance Sheet Strength

Strong Cash Position, Low Leverage Ratios

Balance Sheet Metrics – March 31, 2019

Total Cash ⁽¹⁾ /Cash and Cash Equivalents (\$MM)	\$486 / \$354
Net Debt/EBITDA ⁽²⁾	0.3x
Debt to Book Capitalization ⁽³⁾	21.7%
Interest Coverage ⁽⁴⁾	15.8x
2019 Hedged Production (April – December) ⁽⁵⁾	44%
Dividends (YTD 2019) ⁽⁶⁾	C\$1.44 / 10.3% yield

No debt maturities until 2023

Credit Ratings

S&P	Outlook:	Stable	S&P affirmed a rating of 'BB-' on Frontera's senior unsecured notes on October 4, 2018.
	Issuer Rating:	BB-	
	Senior Notes:	BB-	
Fitch	Outlook:	Negative	Fitch reaffirmed a rating of "B+/RR4" on Frontera's senior unsecured notes on November 27, 2018.
	Issuer Rating:	B+	
	Senior Notes:	B+/RR4	

(1) Total cash balance includes current restricted cash \$38 MM and non-current restricted cash \$93 MM

(2) Net debt/EBITDA is net debt divided by trailing 12 month Operating EBITDA of \$538 MM. Net debt is defined as long-term debt minus working capital. Net debt and Operating EBITDA are Non-IFRS measures

(3) Debt to book capitalization is long term debt divided by long term debt plus shareholders equity

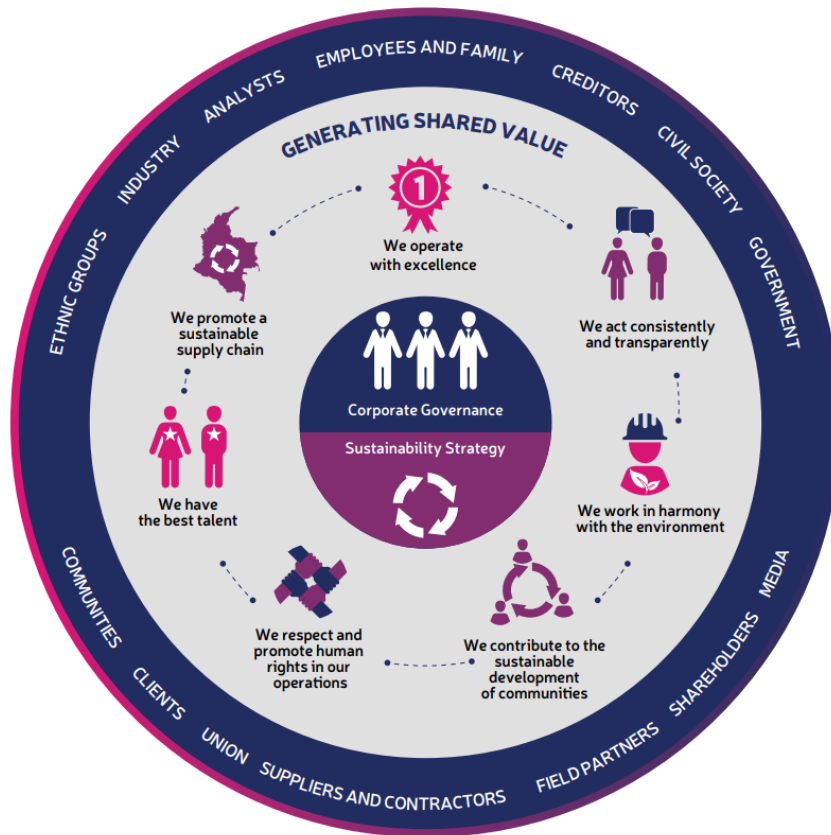

(4) Interest coverage uses trailing 12 month Operating EBITDA of \$538 MM divided by the expected annual cash interest of \$33.95 MM

(5) 35% of production hedged with puts, 9% with cost collars

Corporate Responsibility and Partner of Choice

Committed to Sustainable Operations

Sustainability & Shared Value Model

2018 and 2017 United Nations Global Compact awards recipient

Nominated by World Finance as “The Most Sustainable Oil and Gas Company”

Certified under the ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 norms

- Frontera continues to implement its social investment framework in a manner that encourages local community engagement and involvement.
- Adopted the Declarations on Human Rights and Gender Equality and remain committed to the promotion and protection of human rights, freedom of association, eradication of child and forced labour, security, and the economic, social and cultural rights of local communities.
- To view Frontera’s annual sustainability report please visit <http://www.fronteraenergy.ca/sustainability-reports/>

Core Assets

Quifa: Cornerstone of Heavy Oil Production

Stable Production at 27,000 bbl/d for Five Years

Reserves Balances:

- As of December 31, 2018 (before/after royalties)
 - 1P: 45.0/38.6 MMbbl
 - 2P: 56.8/48.4 MMbbl

Key Characteristics:

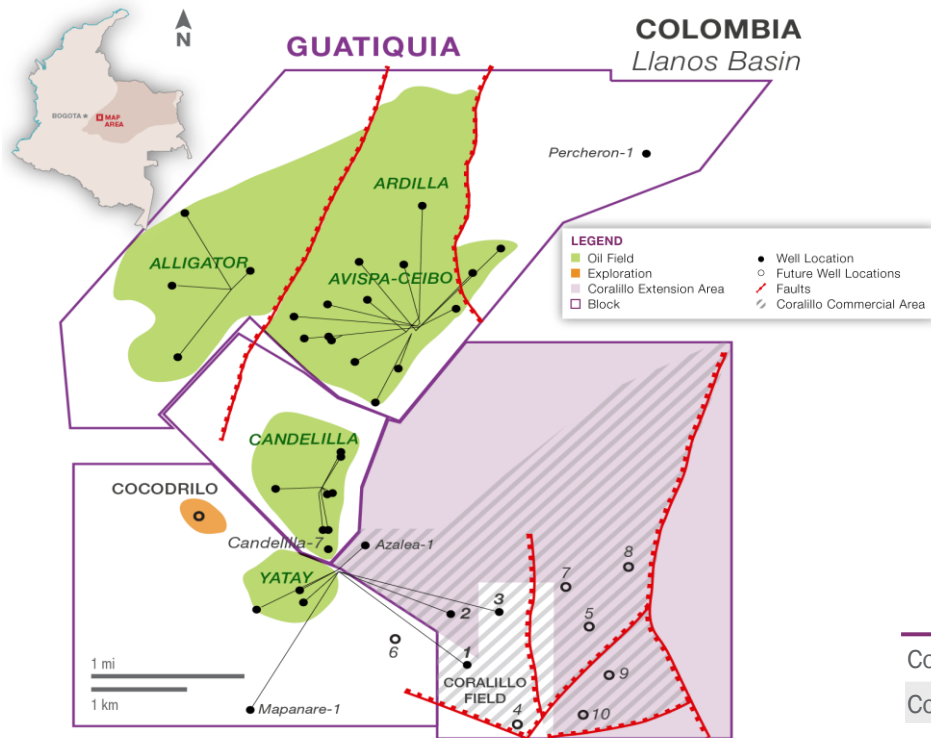

- ~300 wells on production
- Facilities capacity in excess of 1.7 MMbbl/d of water handling capacity
- ~ 600 wells to be drilled in the next 7-8 years
- Additional exploration potential in the area

Contract Name	Quifa Contract
Contract Type	Exploration, Development and Exploitation
Contract Term Expiry	December 2031
2018 Production (before/after royalties)	~27,500/~23,000 bbl/d
2018 2P Reserves	56.8 MMbbl
2019 Estimated Capital Expenditures	\$105 MM
Net Acreage	159,572
Working Interest	60% (operator) / 70% of costs
Partner	Ecopetrol
Base Royalty Rate	6% to 25% ⁽¹⁾

At \$65 Brent, Generates ~ \$250 MM Per Year in Operating Netback

Guatiquía: Building on Deep Llanos Success

Stable Production at 15,000 bbl/d for Three Years

Key Activities:

- Two development wells in 2019
- Cocodrilo exploration in 2020
- Potential expansion of Yatay field

Key Characteristics:

- High productivity light and medium oil reservoirs
- Existing under utilized infrastructure
- Successful appraisal drilling
- Additional exploration potential on the block
- Comingled production added over 900 bbl/d of incremental production in 2018 from three wells
- Waterflooding potential in 2020 and beyond

Contract Name	Guatiquía Contract
Contract Type	Exploration, Development and Exploitation
Contract Term Expiry	August 2035
2018 Production (before/after royalties)	~15,300/~14,300 bbl/d
2018 2P Reserves (before/after royalties)	16.6/15.3 MMbbl
2019 Estimated Capital Expenditures	\$25 MM
Net Acreage	9,274
Working Interest	100%
Base Royalty Rate	6% to 25% ⁽¹⁾

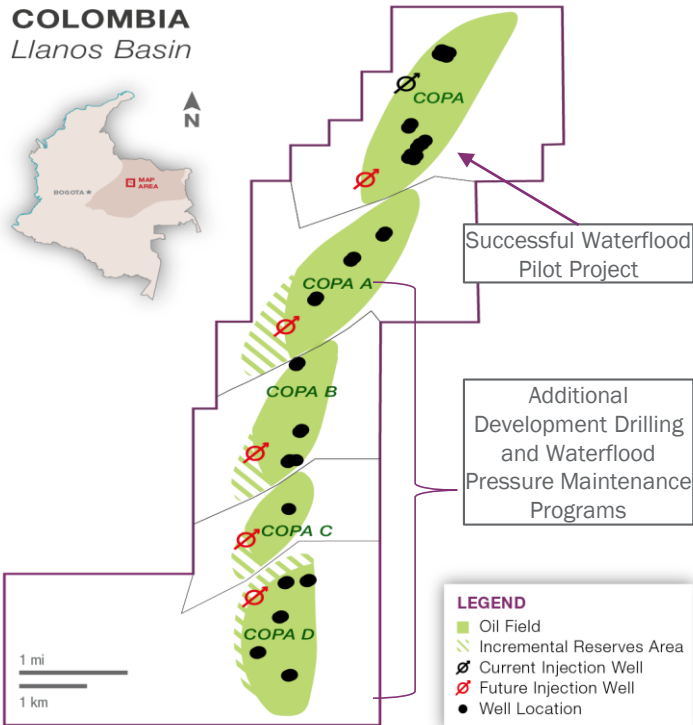

(1) Depending on oil price and production.

Cubiro: Additional Light Oil Potential

Waterflood to Increase Recovery Efficiency and 3X Production Potential

COLOMBIA Llanos Basin

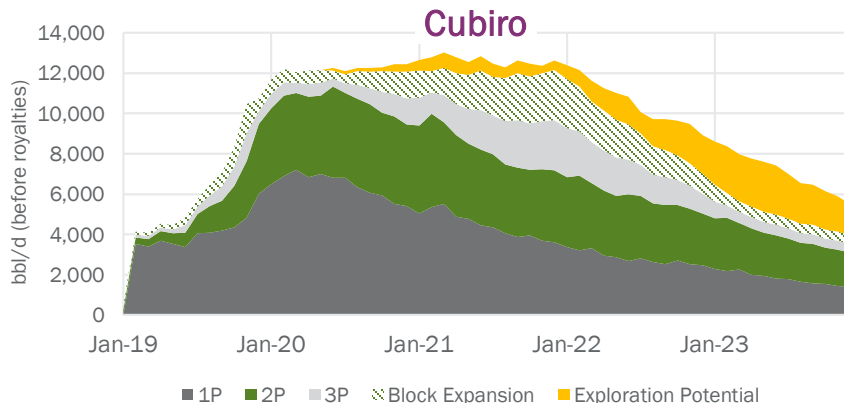

Key 2019 Activities:

- Six development wells
- Two water injector wells
- Start water injection throughout the whole field

Key Features:

- Growing production during the next two years
- Successful waterflooding pilot performed in 2018
- Full field development plan starting in 2019
- Additional appraisal potential in the area
- Copa Trend has three main objectives; Carbonera C3, Carbonera C5 and Carbonera C7
- The net pay of Copa wells is ~10 ft in Carbonera C5D1 and ~15 ft in Carbonera C5D2
- Full field waterflooding project will be implemented in 2019 and 2020
- Producer wells are located along the crest of the reservoir 64 producer wells, 23 in Copa, 14 in Copa A, 8 in Copa B, 4 in Copa C and 14 in Copa D

Contract Name	Cubiro
Contract Type	Exploration and Production
Contract Term Expiry	September 2037
2018 Production (before/after royalties)	~3,550/~3,275 bbl/d
2018 2P Reserves (before/after royalties)	15.6/14.3 MMbbl
2019 Estimated Capital Expenditures	\$35 MM
Net Acreage	44,360
Working Interest	100%
PAP	After 5 MMbbl
Base Royalty Rate	6% to 25% ⁽¹⁾

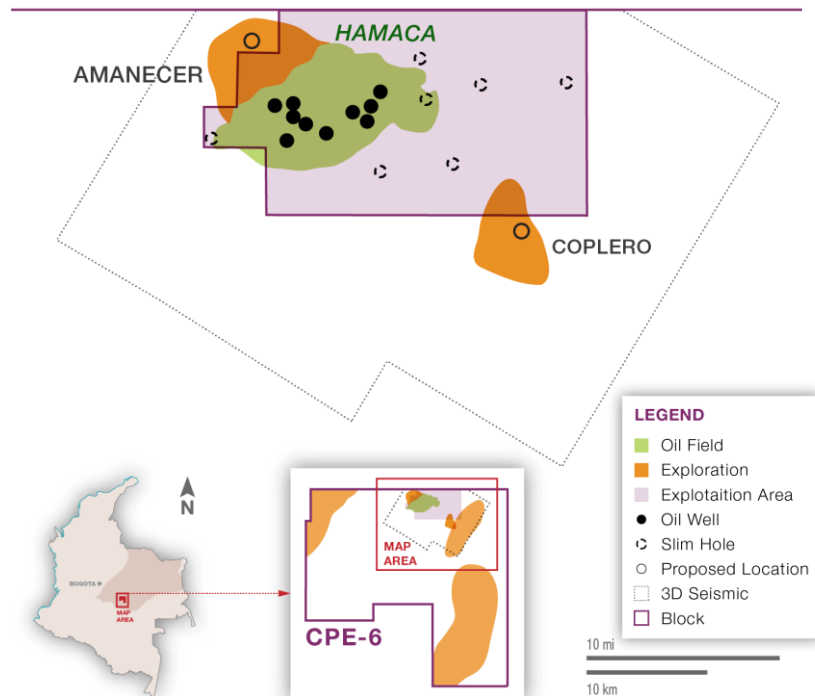

Sustaining & Growth Assets

Hamaca Field (CPE-6)

Large Oil In Place, Reserves, Production Upside

COLOMBIA
Llanos Basin

2018 Reserves Balance (before/after royalties)

- 1P: 21.6/21.6 MMbbl
- 2P: 27.4/27.4 MMbbl
- ~ 190 wells for a 5 Mbbbl/d and 250 Mbbbl/d of water plateau

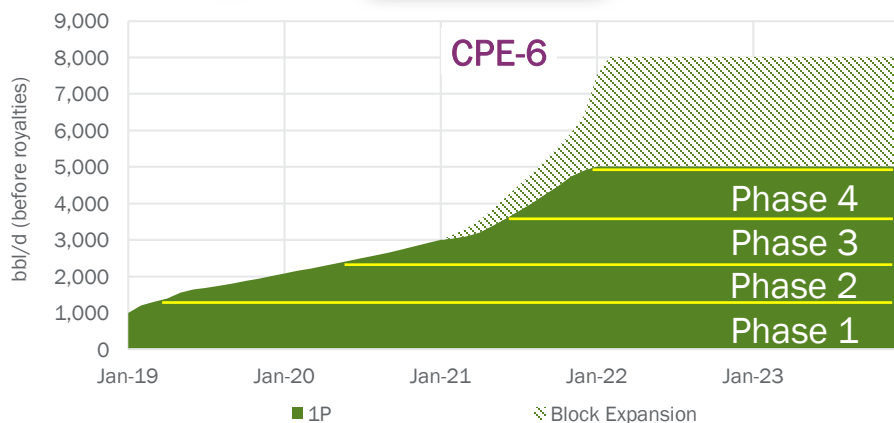

Key 2019 Activities:

- Drill two exploration wells, seven development wells and one injection well
- The Amanecer-1 exploration well extended the northwest part of the field with impressive results
- Two horizontal well tests at over 350 bbl/d of oil with good water cuts
- Currently drilling the Coplero-1 exploration well drilling which is evaluating the southeast extension of the field.

Key Features:

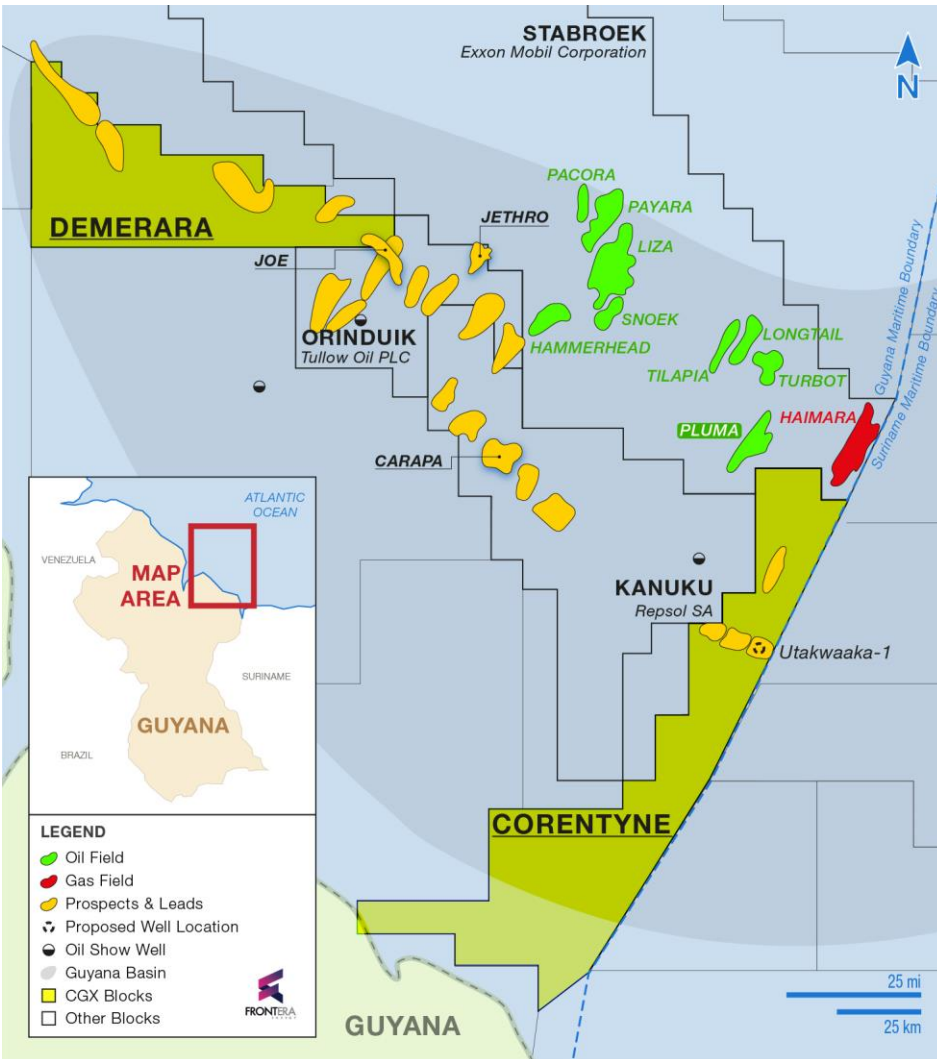

- Potential to grow production following pilot project
- 5 to 8 Mbbbl/d of oil production potential

Contract Name	CPE-6
Contract Type	Exploration and Production
Contract Term Expiry	January 2042
2018 Production (before/after royalties)	940/940 bbl/d
2018 2P Reserves (before/after royalties)	27.4/27.4 MMbbl
2019 Estimated Capital Expenditures	\$17 MM
Net Acreage	26,700
Working Interest	100%
Base Royalty Rate	6% to 25% ⁽¹⁾

Guyana

Exciting Exploration Opportunities

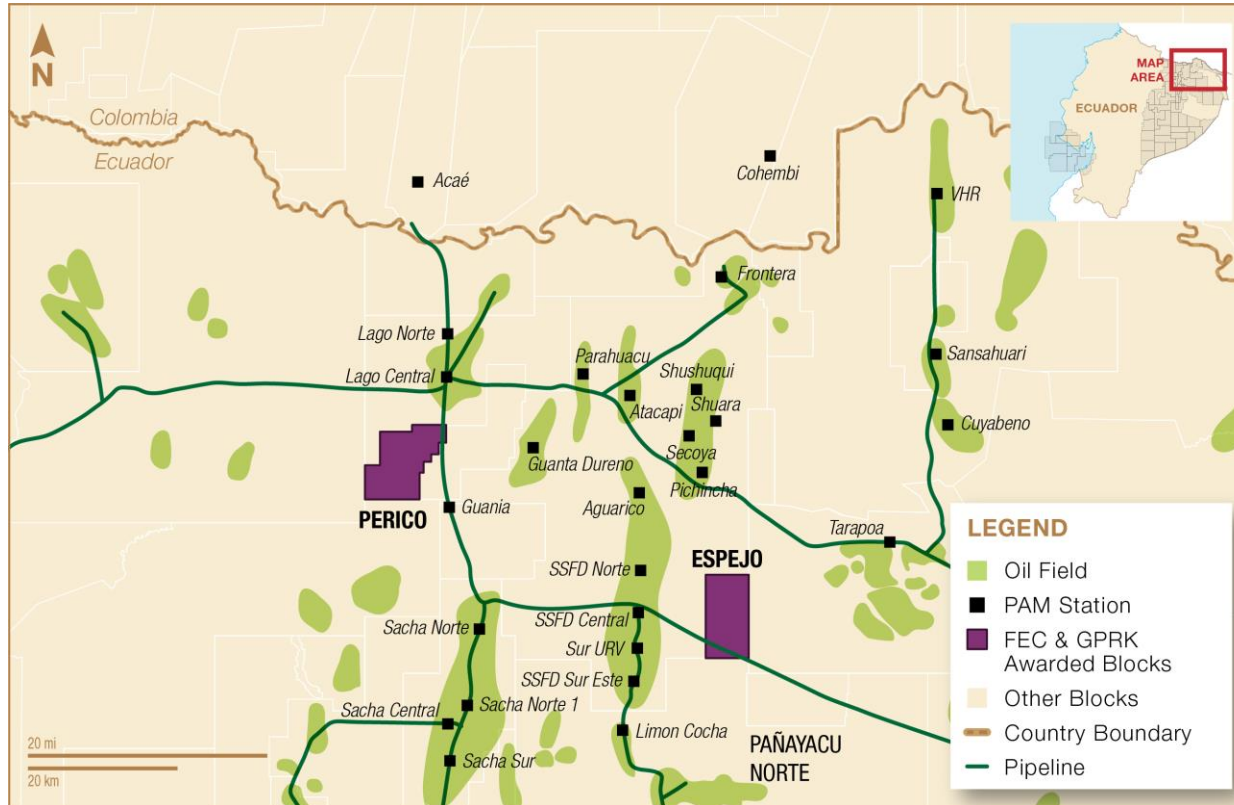

- Over 1.8 million gross acres in the hottest offshore exploration basin in the world
- Two well commitment plus a two well option, total capital estimated at less than \$50 million net to Frontera
- Multiple play types with vertical and lateral migration derisked by ten discoveries on adjacent block
- Two wells to be drilled in 2020, one on each block following evaluation of 3D seismic on each block
- Jethro and Joe prospects currently being drilled on adjacent Oriduoh block
- 8/9 prospects identified with further potential following additional 3D seismic program and evaluation
- Both shallow and medium water depth opportunities
- Equity ownership of 67.78% in CGX (TSXV: OYL)

Contract Name	Petroleum Prospecting License (PPL)
Contract Type	Petroleum Prospecting License (PPL)
Contract Term	First Corentyne well to be drilled in 2020 Second Corentyne well to be drilled by November 27, 2022 First Demerara well to be drilled in 2020 Second Demerara well to be drilled by February 12, 2023
Gross Acreage	1,875,000
Working Interest in the Blocks	33.333%
Base Royalty Rate	1%

Ecuador: Intracampos Exploration Bid Round

Awarded the Perico and Espejo Blocks (Frontera 50% / GeoPark 50%)

- Four year exploration term with two year extension
- Proven hydrocarbon basin near existing production and infrastructure
- Prospective, low-risk exploration blocks located in Sucumbíos Province in the north-eastern part of Ecuador, in the Oriente basin, and have a total area of approximately 13,504 ha (33,369 acres), of which Frontera holds 6,752 ha net (16,685 acres)
- Both blocks are covered with 3D seismic
- The Oriente basin currently produces more than 500,000 bbl/d

Perico Block

- 7,170 ha (17,700 acres)
- The exploration work commitments include:
 - the drilling of four wells
 - 72 km² of 3D seismic reprocessing
 - 72 km² of magnetometry and gravimetry

Espejo Block

- 6,334 ha (15,650 acres)
- The exploration work commitments include:
 - the drilling of four wells
 - 3D seismic acquisition program of 55 km²
 - 74 km² of 3D seismic reprocessing
 - 63 km² of magnetometry

Peru

Potential for New Contract & Shallow Offshore Exploration

Block 192

- Production currently shut in under force majeure following community dispute relating to the NorPeruano pipeline on July 1, 2019
- Production of ~9,500 bbl/d prior to force majeure event
- Current service contract expected to expire in Q1 2020
- Recent change of government - new policies on new contract yet to be established
- 13 producing fields with varying API gravities

Offshore Z-1

- Existing producing fields at Corvina and Albacora in close proximity to Talara Refinery
- Strong pricing - \$1.00 to \$2.00 discount to Brent
- In process of re-evaluating the exploration prospects on the block

2018 Net Production	8,000 bbl/d subject to pipeline availability
Net Acreage	1,266,037
Working Interest	Service Contract ⁽¹⁾
Crude Split	84% FEC, 16% Perupetro
Cumulative Production ⁽²⁾	734 MMbbl
Operator	Frontera

(1) The Company does not hold a working interest in the block. Frontera receives payment in-kind from Perupetro S.A., which ranges from 44% to 84% of production. Frontera currently receives 83% - 84% of production from the block

(2) Cumulative production of the block as of December 31, 2018

Realizing Value from Non-Core Assets

Midstream and Infrastructure Assets Hold Significant Value

1) ODL Pipeline

35.0% Indirect Interest⁽¹⁾

- Ships the Company's heavy crude oil from Quifa SW and Cajua fields to Coveñas export terminal via Bicentenario/OCENSA
- 235 km of 24" pipeline
- 340 Mbbl/d capacity
- Other major shareholders:
 - ✓ CENIT: 65.0%
 - ✓ IFC: 12.7%⁽²⁾

2) Puerto Bahía

39.2% Indirect Interest⁽²⁾

- Greenfield liquids import-export terminal with 2.4 MMbbl of storage capacity and a dry terminal for various types of cargo
- Potential near-term value accretion by connecting to refinery and expanding dry dock
- Assessing refinancing opportunities
- Other major shareholders:
 - ✓ IFC: 32.3%⁽³⁾
 - ✓ Blue Pacific: 19.1%

(1) Indirect interest through Pacific Midstream Limited
(2) Indirect interest through Infrastructure Ventures Inc.
(3) International Finance Corporation – World Bank Group

Investment Opportunity

Enhancing the Portfolio

Focused asset base in North Andean Region

97% oil weighted with Brent price exposure

Experienced, technically-focused management team in place

Partner of Choice

Attractive, low-risk “brownfield” development opportunities

Strong balance sheet with targeted quarterly dividend of \$15 million with \$40 million special dividend and 5% NCIB

Improved transportation costs and commitments

Over 90% near-field exploration success in 2018

Appendix

Second Quarter 2019 Operational & Financial Highlights

Strong Operating EBITDA and Improving Cost Structure

	Q2 2019	Q1 2019	% Chg.
Production Before Royalties (Boe/d)	74,385	67,974	9%
Production After Royalties (Boe/d)	67,114	62,893	7%
Net Income (Loss) (\$MM)	\$228	\$46	>100%
Net Sales (\$MM) ⁽¹⁾	\$362	\$293	24%
Cash Flow from Ops (\$MM)	\$176	\$72	100%
Operating EBITDA (\$MM) ⁽²⁾⁽³⁾	\$181	\$145	25%
Combined Realized Price (\$/Boe) ⁽³⁾	\$64.68	\$57.78	12%
Operating Costs (\$/Boe)	\$11.17	\$11.40	(2%)
Operating Netback (\$/Boe) ⁽¹⁾	\$36.45	\$30.23	21%
Capital Expenditures (\$MM)	\$73	\$69	6%
G&A Expenses (\$MM)	\$18	\$16	13%

Price / Revenue / Production

Brent oil prices increased 7% quarter-over-quarter to \$68.47/bbl while realized price increased 11% quarter-over-quarter.

Revenue was \$377.3 million, relatively unchanged compared to \$377.5 million in the first quarter of 2019.

Production averaged 74,931 boe/d. Current production is over 65,000 boe/d as a result of a new force majeure event on the NorPeruano pipeline impacting production on Block 192.

Production was 97% oil weighted in the second quarter of 2019 compared to 96% in the first quarter of 2019. The higher oil mix as a percentage of total production results in better realized prices given strong Brent oil prices and narrow Vasconia oil differentials.

Strong Operating EBITDA

Operating EBITDA of \$181.2 million was 25% higher than Q1 2019 and 45% higher than Q2 2018.

Cost Improvements

Production costs during the second quarter of 2019 were 2% lower compared to the first quarter of 2019. Continued cost savings and efficiency improvement initiatives are being implemented.

Capital Expenditures

Capital expenditures of \$73 million during the second quarter of 2019 were 6% higher than the first quarter of 2019 driven by the drilling of 42 wells during the quarter as compared to 31 wells in the prior quarter.

(1) Non-IFRS Measures. See advisories
(2) Excludes fees paid on suspended pipeline capacity
(3) Includes other revenue and realized losses on risk management contracts

Second Quarter 2019

Financial & Operational

Highlights

Net income of \$228 MM (\$2.32/share) in Q2 2019 compared to net income of \$46 MM in (\$0.47/share) in Q1 2019 driven by strong realized prices and lower operating and transportation costs.

Cash provided by operating activities of \$176 MM in Q2 2019 compared to cash provided by operating activities of \$72 MM in Q1 2019. Cash provided by operating activities adjusted for changes in non-cash working capital was \$183 MM in Q2 2019.

Operating EBITDA of \$181 MM was 25% higher than Q1 2019.

Operating netback during Q2 2019 was \$36.45/boe, 21% higher than in Q1 2019 driven by higher production, higher realized prices, and lower production costs.

Production averaged 74,385 boe/d, an increase of 9% compared to Q1 2019. Current production is over 65,000 boe/d, as a result of a new force majeure event on the NorPeruano pipeline impacting production from Block 192 in Peru.

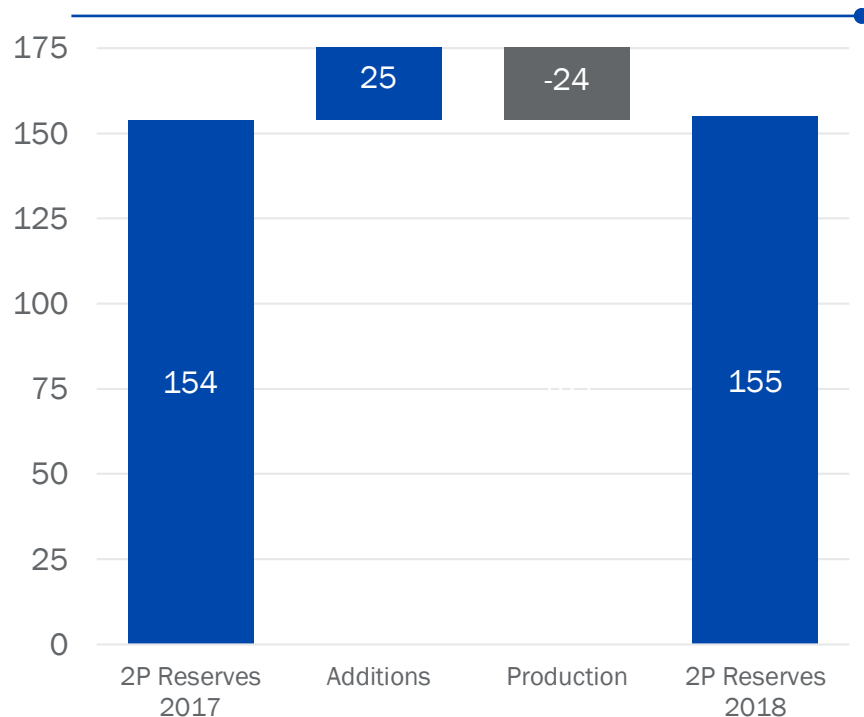

A total of 42 development and exploration wells were drilled in Q2 2019. 39 development wells were drilled compared to 37 development wells planned, as efficiency improvements at Quifa have led to wells being drilled in less time.

Production costs during Q2 2019 were \$11.17/boe, 2% lower compared to Q1 2019.

2018 Reserves Evaluation Results

Replaced 103% of 2018 Production and Strong 2P NPV10 Value

2P Net Reserves - MMBOE

NPV by Category @ 10% (MMUSD)

- Replaced 103% of 2018 proved 2P reserves
- Heavy oil represents 62% of proved plus probable reserves, light oil 36% and natural gas 2%
- 68% of 2018 total company 2P reserves are proved
- Reserves additions driven by Quifa CMA project and Guatiquia discoveries
