

Enhancing the Portfolio

May 2019

Advisories

This presentation contains forward-looking statements. All statements, other than statements of historical fact that address activities, events or developments that Frontera Energy Corporation (the “Company” or “Frontera”) believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding dividend payments, estimates or assumptions in respect of expected production levels, operating EBITDA, capital expenditures, drilling plans involving completion and testing and the anticipated timing thereof, revenue, costs, production costs, transportation costs, reserve and resource estimates, potential resources and reserves, and the Company's exploration and development plans and objectives) are forward-looking statements. These forward-looking statements reflect the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking statements are subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, the Company. Factors that could cause actual results or events to differ materially from current expectations include, among other things: uncertainty of estimates of capital and operating costs; production estimates and estimated economic return; failure to meet project timelines; uncertainties associated with estimating oil and natural gas reserves; failure to establish estimated resources or reserves; operating hazards and risks; volatility in market prices for oil and natural gas; fluctuation in currency exchange rates; inflation; changes in equity markets; perceptions of the Company's prospects and the prospects of the oil and gas industry in Colombia and the other countries where the Company operates or has investments; the uncertainties involved in interpreting drilling results and other geological data; and the other risks disclosed under the heading “Risk Factors” in the Company's annual information form dated March 13, 2019 filed on SEDAR at www.sedar.com. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking statements are reasonable, forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.

This presentation contains future oriented financial information and financial outlook information (collectively, “FOFI”) (including, without limitation, statements regarding operating EBITDA, capital expenditures (including maintenance & development drillings, exploration activities, facilities & infrastructure and administrative and others), production costs, and transportation costs for the Company in 2019), and are subject to the same assumptions, risk factors, limitations and qualifications as set forth in the above paragraph. The FOFI has been prepared by management to provide an outlook of the Company's activities and results, and such information may not be appropriate for other purposes. The Company and management believe that the FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments, however, actual results of operations of the Company and the resulting financial results may vary from the amounts set forth herein. Any FOFI speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any FOFI, whether as a result of new information, future events or results or otherwise. The Company discloses several financial measures in this presentation that do not have any standardized meaning prescribed under International Financial Reporting Standards (“IFRS”) (including operating EBITDA, operating netback and net sales). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. For more information, please see the Company's management's discussion and analysis dated March 13, 2019 for the year ended December 31, 2018 filed on SEDAR at www.sedar.com.

All reserves estimates contained in this presentation were prepared in accordance with the definitions, standards and procedures contained in the Canadian Oil and Gas Evaluation Handbook and National Instrument 51-101 – Standards of Disclosure for Oil and Gas Activities (“NI 51-101”) and included in form 51-101F1 – Statement of Reserves Data and Other Oil and Gas Information filed on SEDAR. Additional reserves information as required under NI 51-101 can also be found on SEDAR, under the: (i) Forms 51-101F2 – Report on Reserves Data by Independent Qualified Reserves Evaluator completed by each of DeGolyer and MacNaughton on February 26, 2019; and (ii) Form 51-101F3 – Report of Management and Directors on Oil and Gas Disclosure dated March 13, 2019. All reserves presented are based on forecast pricing and estimated costs effective December 31, 2018 as determined by the Company's independent reserves evaluators. The Company's net reserves after royalties incorporate all applicable royalties under Colombia and Peru fiscal legislation based on forecast pricing and production rates, including any additional participation interest related to the price of oil applicable to certain Colombian blocks, as at December 31, 2018. Contingent resources are those quantities of petroleum estimated, as of a given date, to be potentially recoverable from known accumulations using established technology or technology under development, but which are not currently considered to be commercially recoverable due to one or more contingencies. Contingent Resources have an associated chance of development (economic, regulatory, market and facility, corporate commitment or political risks). The estimates herein have not been risked for the chance of development. There is no certainty that the contingent resources will be developed and, if they are developed, there is no certainty as to the timing of such development or that it will be commercially viable to produce any portion of the contingent resources. It is not an estimate of volumes that may be recovered. Actual recovery is likely to be less and may be substantially less or zero.

Resources do not constitute, and should not be confused with, reserves. “Internal estimate” means an estimate that is derived by Frontera's internal engineers and geologists. Internal estimates should be considered preliminary until analyzed and certified by third party reserves evaluators. As a result, readers are cautioned not to place undue reliance on such estimates.

The term “boe” is used in this presentation. Boe may be misleading, particularly if used in isolation. A boe conversion ratio of cubic feet to barrels is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. In this presentation, boe has been expressed using the Colombian conversion standard of 5.7 Mcf: 1 bbl required by the Colombian Ministry of Mines and Energy.

In addition, reported production levels may not be reflective of sustainable production rates and future production rates may differ materially from the production rates reflected in this presentation due to, among other factors, difficulties or interruptions encountered during the production of hydrocarbons.

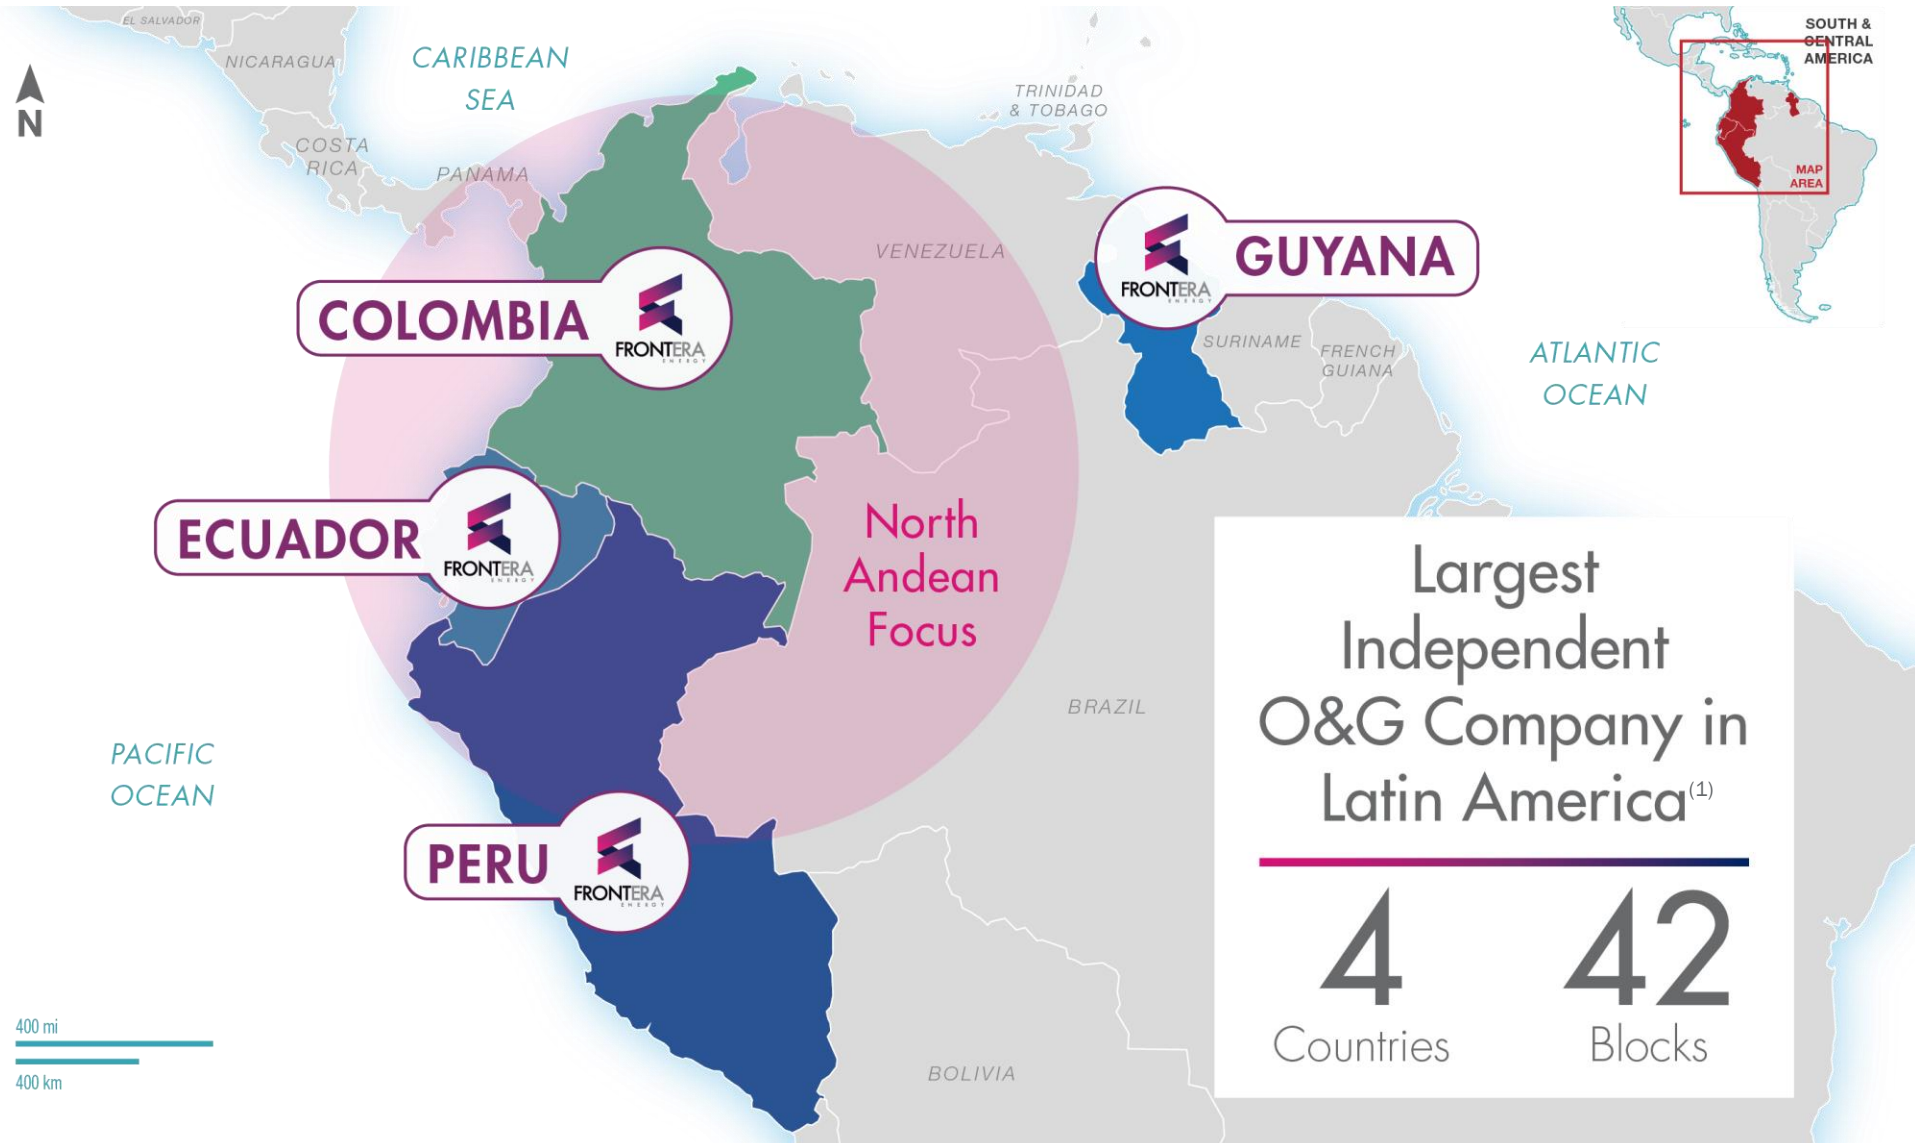

The values in this presentation are expressed in United States dollars and all production volumes are expressed before royalties, unless otherwise stated. Some figures presented are rounded and data in tables may not add due to rounding.

Company Overview

Frontera Energy

North Andean Focus

(1) By production.

Frontera Energy

Company Snapshot

Capital Structure (\$U.S.)⁽¹⁾

Shares Outstanding (TSX: FEC; MM)	98
Market Cap (\$MM) ⁽²⁾	\$873
Total Cash ⁽³⁾ / Cash and Cash Equivalents (\$MM)	\$487 / \$341
Long-Term Debt (\$MM, Face/Market Value) ⁽⁴⁾	\$350 / \$373
Enterprise Value (\$MM) ⁽²⁾⁽⁵⁾	\$972

Reserves (Dec. 31, 2018)⁽⁶⁾

Proved (1P; MMBoe)	116
Probable (MMBoe)	55
Proved + Probable (2P; MMBoe)	171
PDP NPV10 After Tax	\$731
1P NPV10 After Tax	\$1,428
2P NPV10 After Tax	\$2,206

Strong balance sheet provides opportunities for enhanced shareholder returns

Targeted quarterly dividend of \$12.5 million with \$25 million initial dividend and 5% NCIB

Longer term growth investment opportunities in Colombia, Guyana, Ecuador, and Peru

Q1 2019 Production Mix

2018 Net 2P Reserves⁽⁶⁾

(1) Shares outstanding, cash and cash equivalents, long-term debt and non-controlling interests as at March 31, 2019.

(2) Assumes Frontera share price of CAD\$12.00 and USD/CAD exchange rate of 1.345.

(3) Total cash balance includes current restricted cash \$41 MM and non-current restricted cash \$105 MM.

(4) \$350 million senior unsecured notes due 2023 are rated BB- by S&P and BB-/RR4 by Fitch, May 2019 market price \$106.5.

(5) Enterprise value is calculated as the market capitalization plus long-term debt, minority interest (\$67 MM), minus total unrestricted cash and cash equivalents.

(6) Reserves report was prepared by DeGolyer and MacNaughton ("D&M"), PDP reserves of 39 MMBoe before royalties.

2019 Guidance

Strong EBITDA, Lower Capex, Stable Costs

2019 Guidance Metrics ⁽¹⁾			
	2018 Actual	2019 Guidance	Q1 2019
Operating EBITDA ⁽²⁾	\$423 MM	\$400 - \$450 MM	\$145 MM
Capital Expenditures	\$446 MM	\$325 - \$375 MM	\$69 MM
Average Daily Production (before royalties)	71.0 MBoe/d	65 – 70 MBoe/d	68 Mboed/d
Production Cost (\$/Boe) ⁽²⁾	\$12.51	\$12.50 - \$13.50	\$11.40
Transportation Cost (\$/Boe) ⁽³⁾	\$12.77	\$12.50 - \$13.50	\$12.70
Brent Oil Price Assumption	\$71.69/Bbl	\$65.00/Bbl	\$63.83/Bbl
Oil Price Differential	\$4.75/Bbl	\$8.40/Bbl	\$3.43/Bbl

(1) Assuming average Brent oil price for 2019 of \$65.00/Bbl and a USD/COP 3,000:1.

(2) Shown before royalties. Production cost guidance for 2018 using production after royalties is \$14.00/Boe to \$14.50/Boe. Starting in Q4 2018 and for 2019, production cost results and guidance will be calculated using production before royalties in the denominator as this most accurately reflects per unit production cost and is consistent with our peers.

(3) Calculated using production after royalties as this most accurately reflects per unit transportation costs.

2019 EBITDA Sensitivities

Using 2019 Budget Estimates of \$65.00/Bbl Brent, 3,000:1 USDCOP,
Differential of \$8.40/Bbl Generates \$400 MM - \$450 MM in Annual EBITDA

Production Cost (\$/Bbl)	+\$1.0	(26)	26	(\$1.0)
Transport Cost (\$/Bbl)	+\$1.0	(23)	23	(\$1.0)
Impact of Differentials (\$/Bbl)	+\$1.0	(21)	21	(\$1.0)
Brent Oil (\$/Bbl)	(\$1)	(17)	17	+\$1
FX Rate USD/COP ⁽¹⁾	(100)	(13)	13	+100
General & Administrative Costs (\$/Bbl)	+\$0.5	(13)	13	(\$0.5)
Production (Boe/d before royalties)	(1,000)	(11)	11	+1,000

(1) FX rate sensitivity also impacts capex by \$6 MM for each 100 COP/USD move

2019 Guidance

Strong EBITDA, Lower Capex, Lower Costs

Daily Production, before royalties (Boe/d)

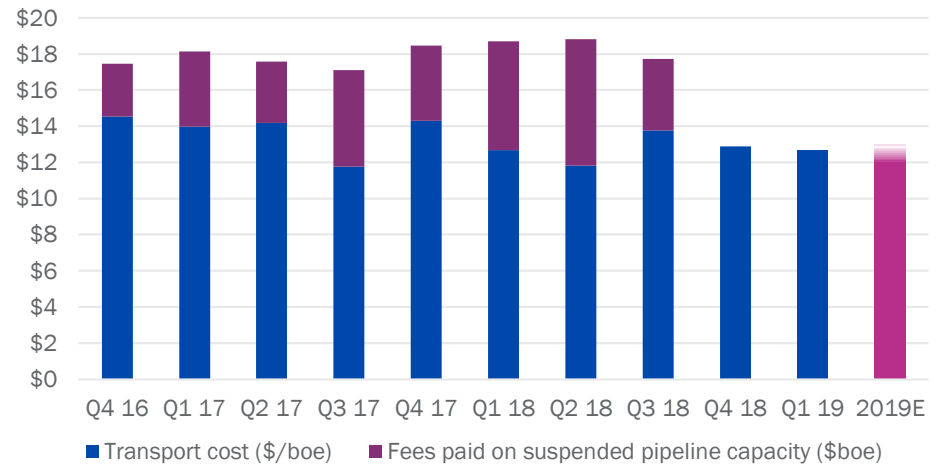

Operating EBITDA and Capex (\$MM)

Production Cost (\$/Boe)

Transportation Cost (\$/Boe)

Company Strategy

Sustaining Base Production for the Next Three to Five Years from Core Assets
Optimizing Cash Generation and Delivering Enhanced Shareholder Returns

Core Portfolio of Stable Assets
with Growth Options

Partner of Choice Wherever We Operate
(Parex, GeoPark, CGX)

Maintain Strong Balance Sheet, Financial
Flexibility and Low Leverage Ratios to
Enhance Shareholder Returns
(5% NCIB and quarterly dividend of
\$12.5 million⁽¹⁾)

Potential to Add New Barrels Through

- Exploration success in Guyana and Colombia
- Ecuador and Colombia Bid Rounds
- New contract opportunities in Peru and Colombia
- Additional farm-in opportunities

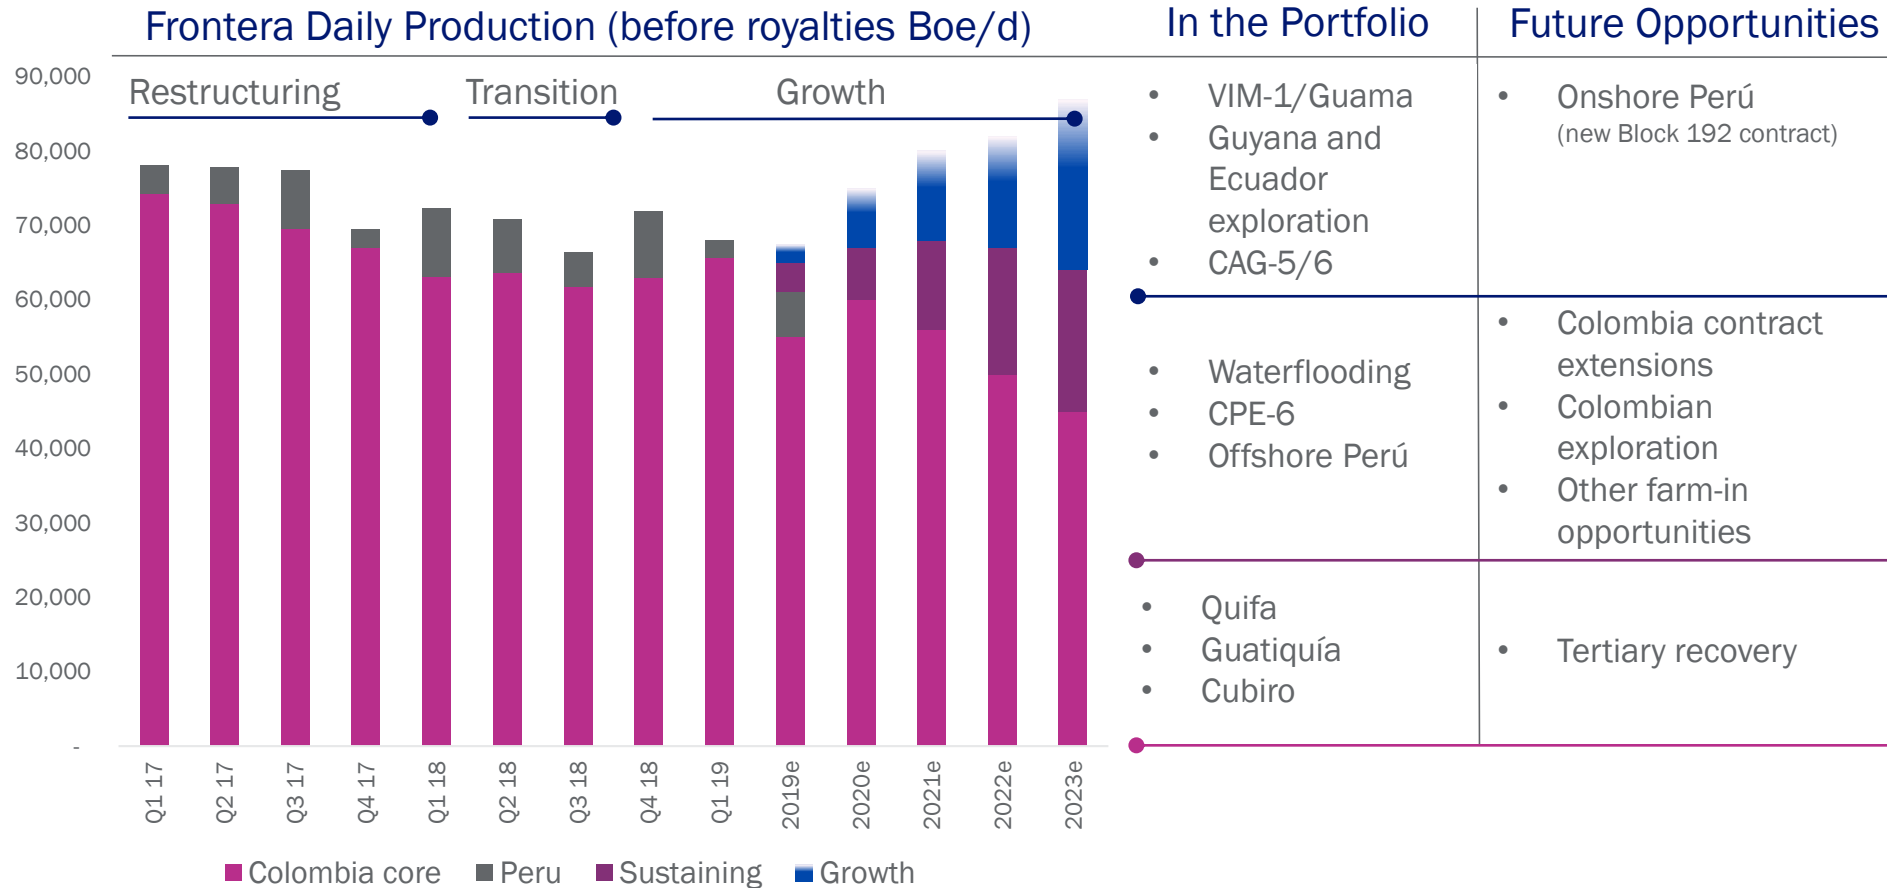

Continued Focus on Operational Efficiencies
to Deliver Lower Costs

Realizing Value from Non-Core Assets

(1) Dividend policy is to pay \$12.5 million per quarter when Brent averages above \$60/Bbl.

Core Assets Deliver Stable Base Production

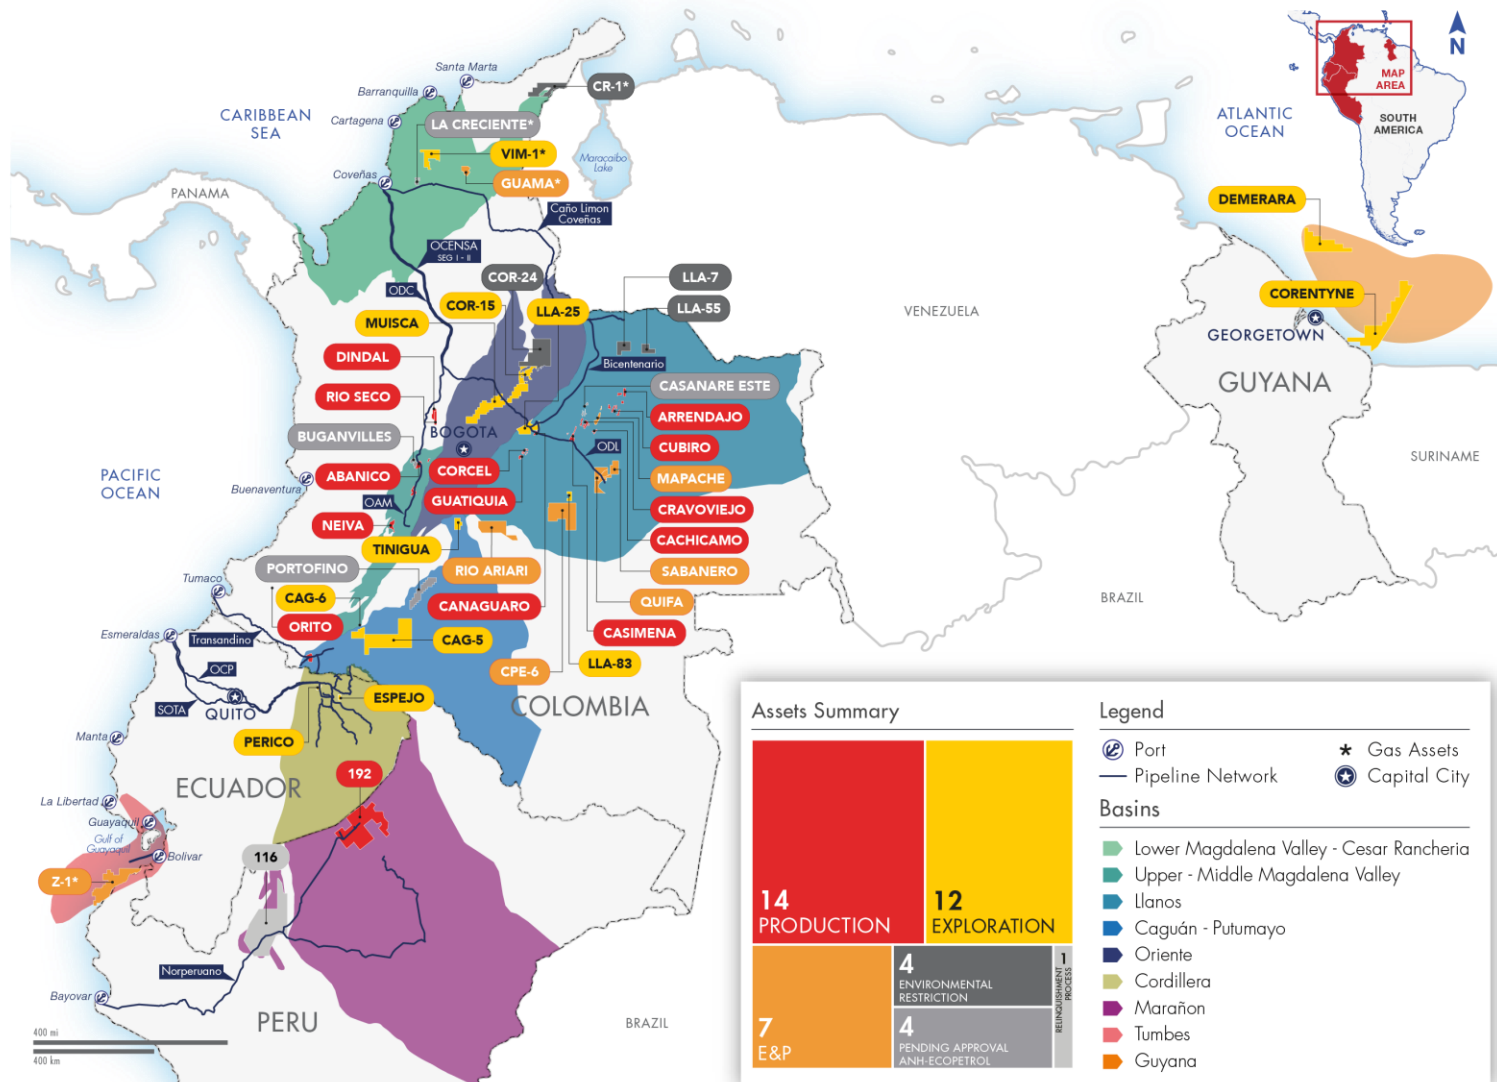

Seven Year Production Profile from Restructuring to Growth

\$250 MM to \$300 MM in Annual Capital Expenditures to Maintain Core and Sustaining Production at over 65,000 Boe/d

Our Portfolio

Large Diversified Asset Base with Significant Acreage and Infrastructure

CORE

- Quifa
- Guatiquía
- Cubiro

SUSTAINING

- CPE-6
- Z-1 (Peru)
- Near field exploration

GROWTH

- Colombia existing exploration and new acreage
- Offshore Guyana
- Ecuador (Perico & Espejo)
- New contract opportunity Block 192
- Farm-in opportunities

Balance Sheet Strength

Strong Cash Position, Low Leverage Ratios

Balance Sheet Metrics – March 31, 2019

Total Cash ⁽¹⁾ /Cash and Cash Equivalents (\$MM)	\$487 / \$341
Net Debt/EBITDA ⁽²⁾	0.4x
Debt to Book Capitalization ⁽³⁾	24.9%
Interest Coverage ⁽⁴⁾	14.2x
2019 Hedged Production (April – December) ⁽⁵⁾	44%
Dividends (YTD 2019) ⁽⁶⁾	C\$0.495 / 4.0% yield

No debt maturities until 2023

Credit Ratings

S&P	Outlook:	Stable	S&P affirmed a rating of 'BB-' on Frontera's senior unsecured notes on October 4, 2018.
	Issuer Rating:	BB-	
	Senior Notes:	BB-	
Fitch	Outlook:	Negative	Fitch reaffirmed a rating of "B+/RR4" on Frontera's senior unsecured notes on November 27, 2018.
	Issuer Rating:	B+	
	Senior Notes:	B+/RR4	

(1) Total cash balance includes current restricted cash \$41 MM and non-current restricted cash \$105 MM

(2) Net debt/EBITDA is net debt divided by trailing 12 month Operating EBITDA of \$481 MM. Net debt is defined as long-term debt minus working capital. Net debt and Operating EBITDA are Non-IFRS measures

(3) Debt to book capitalization is long term debt divided by long term debt plus shareholders equity

(4) Interest coverage uses trailing 12 month Operating EBITDA of \$481 MM divided by the expected annual cash interest of \$33.95 MM

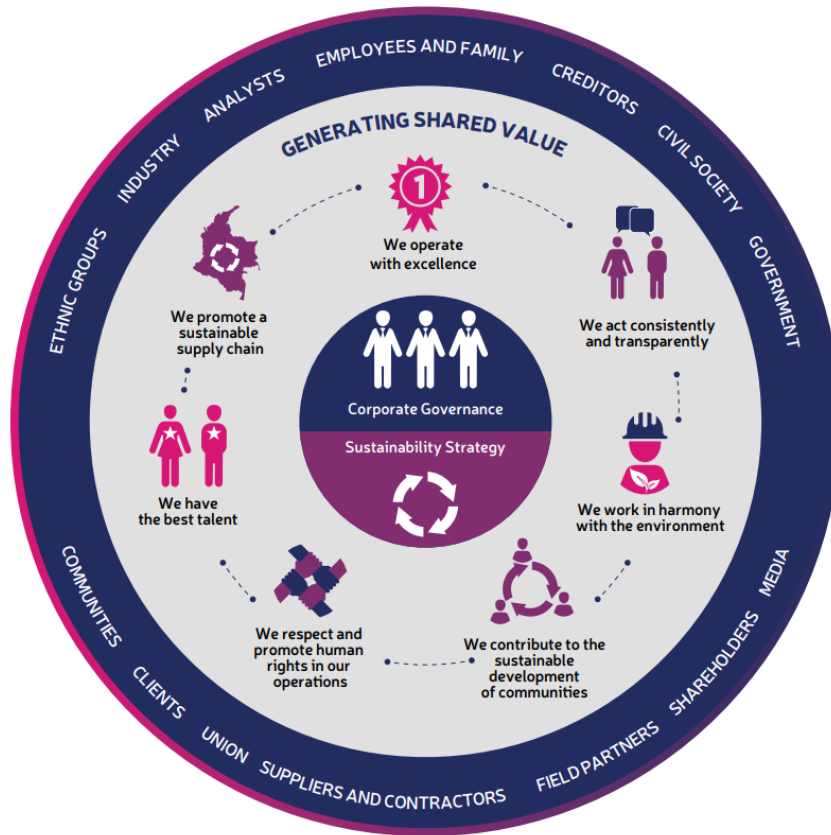

(5) 35% of production hedged with puts, 9% with zero cost collars

(6) Dividend policy is to pay \$12.5 million per quarter when Brent averages above \$60/Bbl.

Corporate Responsibility and Partner of Choice

Committed to Sustainable Operations

Sustainability & Shared Value Model

2018 and 2017 United Nations Global Compact awards recipient

Nominated by World Finance as “The Most Sustainable Oil and Gas Company”

Certified under the ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 norms

Frontera:

- implemented its social investment framework in a manner that encourages local community engagement and involvement.
- adopted the Declarations on Human Rights and Gender Equality
- remains committed to the promotion and protection of human rights, freedom of association, eradication of child and forced labour, security, and the economic, social and cultural rights of local communities.

To view Frontera’s annual sustainability report please visit <http://www.fronteraenergy.ca/sustainability-reports/>

Core Assets

Quifa: Cornerstone of Heavy Oil Production

Stable Production at 27,000 Bbl/d for Five Years

Reserves Balances:

- As of December 31, 2018 (before/after royalties)
 - 1P: 45.0/38.6 MMBbl
 - 2P: 56.8/48.4 MMBbl

Key Characteristics:

- ~300 wells on production
- Facilities capacity in excess of 1.7 MMBbl/d of water handling capacity
- ~ 600 wells to be drilled in the next 7-8 years
- Additional exploration potential in the area

Contract Name	Quifa Contract
Contract Type	Exploration, Development and Exploitation
Contract Term Expiry	December 2031
2018 Production (before/after royalties)	~27,500/~23,000 Bbl/d
2018 2P Reserves	56.8 MMBbl
2019 Estimated Capital Expenditures	\$105 MM
Net Acreage	159,592
Working Interest	60% (operator) / 70% of costs
Partner	Ecopetrol
Base Royalty Rate	6% to 25% ⁽¹⁾

At \$65 Brent, Generates ~ \$250 MM Per Year in Operating Netback

Guatiquía: Building on Deep Llanos Success

Stable Production at 15,000 Bbl/d for Three Years

Key Activities:

- Two development wells in 2019
- Cocodrilo exploration in 2020
- Potential expansion of Yatay field

Key Characteristics:

- High productivity light and medium oil reservoirs
- Existing under utilized infrastructure
- Successful appraisal drilling
- Additional exploration potential on the block
- Comingled production added over 900 Bbl/d of incremental production in 2018 from three wells
- Waterflooding potential in 2020 and beyond

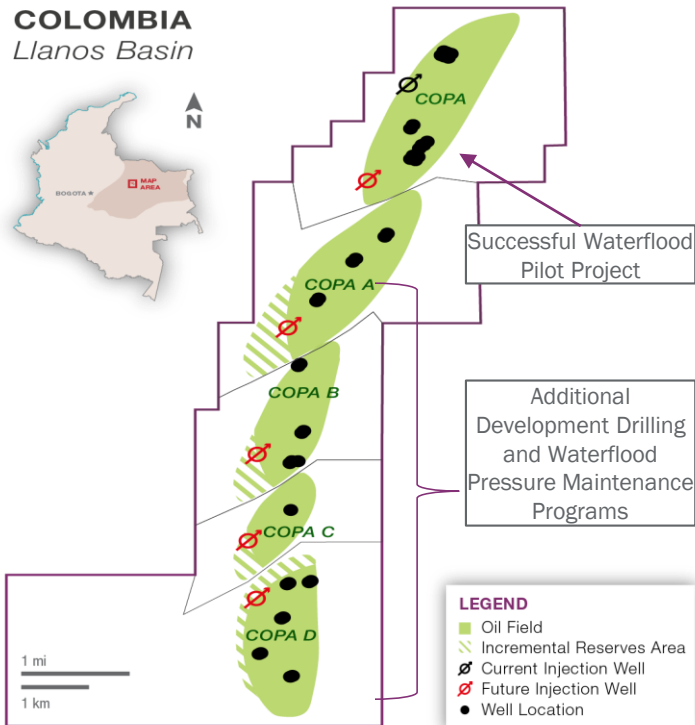

Contract Name	Guatiquía Contract
Contract Type	Exploration, Development and Exploitation
Contract Term Expiry	August 2035
2018 Production (before/after royalties)	~15,300/~14,300 Bbl/d
2018 2P Reserves (before/after royalties)	16.6/15.3 MMBbl
2019 Estimated Capital Expenditures	\$25 MM
Net Acreage	11,086
Working Interest	100%
Base Royalty Rate	6% to 25% ⁽¹⁾

(1) Depending on oil price and production.

Cubiro: Additional Light Oil Potential

Waterflood to Increase Recovery Efficiency and 3X Production Potential

Key 2019 Activities:

- Six development wells
- Two water injector wells
- Start water injection throughout the whole field

Key Features:

- Growing production during the next two years
- Successful waterflooding pilot performed in 2018
- Full field development plan starting in 2019
- Additional appraisal potential in the area
- Copa Trend has three main objectives; Carbonera C3, Carbonera C5 and Carbonera C7
- The net pay of Copa wells is ~10 ft in Carbonera C5D1 and ~15 ft in Carbonera C5D2
- Full field waterflooding project expected to be implemented in 2019 and 2020
- Producer wells are located along the crest of the reservoir 64 producer wells, 23 in Copa, 14 in Copa A, 8 in Copa B, 4 in Copa C and 14 in Copa D

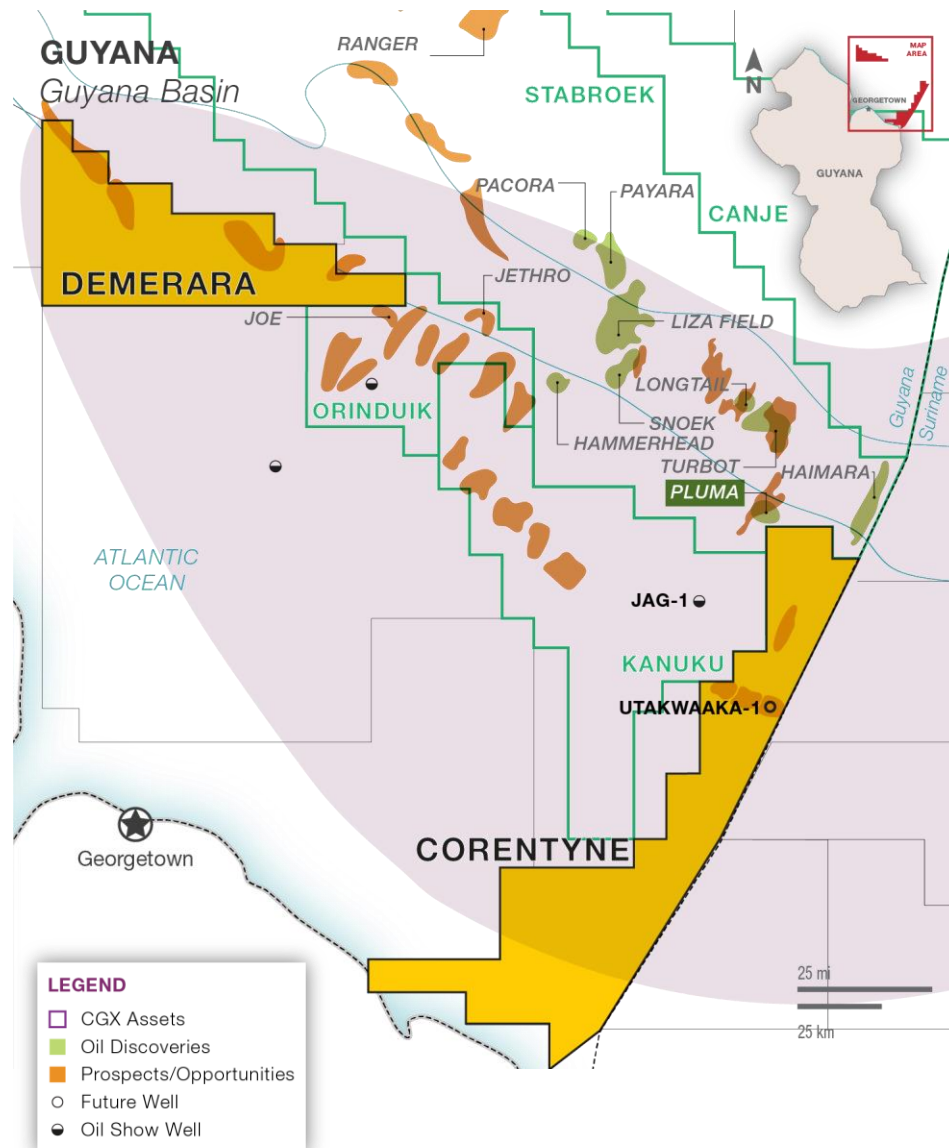

Contract Name	Cubiro
Contract Type	Exploration and Production
Contract Term Expiry	September 2037
2018 Production (before/after royalties)	~3,550/~3,275 Bbl/d
2018 2P Reserves (before/after royalties)	15.6/14.3 MMBbl
2019 Estimated Capital Expenditures	\$35 MM
Net Acreage	31,029
Working Interest	100%
PAP	After 5 MMBbl
Base Royalty Rate	6% to 25% ⁽¹⁾

Sustaining & Growth Assets

Guyana

Exciting Exploration Opportunities

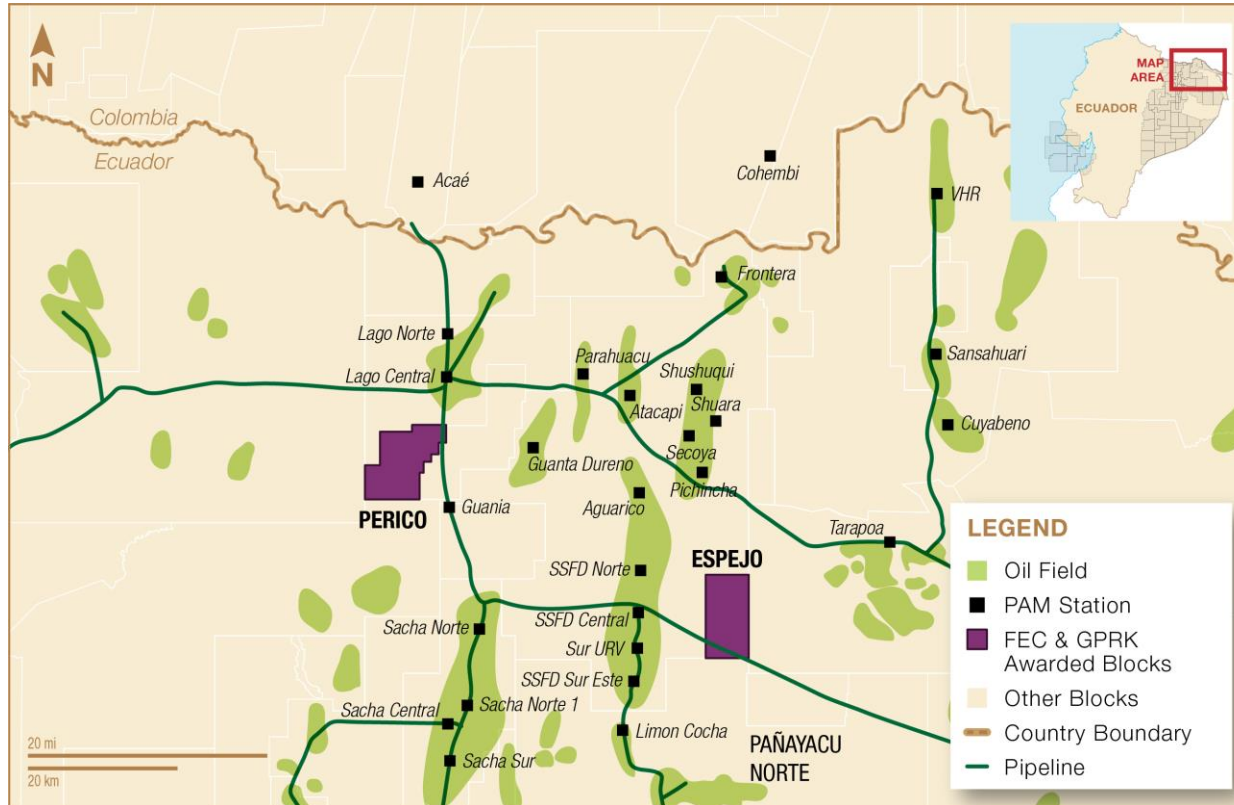

- Over 1.8 million gross acres in the hottest offshore exploration basin in the world
- Two well commitment plus a two well option, total capital estimated at less than \$50 million net to Frontera
- Multiple play types with vertical and lateral migration derisked by 13 discoveries on adjacent block with 5.5 billion boe of resources
- First well, Utakwaaka-1, to be drilled by the end of November 2019, additional 3-4 peer wells drilled in 2019
- Contracted the Rowan Ralph Coffman Jack Up
- 8-9 prospects identified with further potential following additional 3D seismic program and evaluation
- Both shallow and medium water depth opportunities
- Equity ownership of ~67.78% in CGX (TSXV: OYL)

Contract Name	Petroleum Prospecting License (PPL)
Contract Type	Petroleum Prospecting License (PPL)
Contract Term	<p>First Corentyne well to be drilled by November 27, 2019</p> <p>Second Corentyne well to be drilled by November 27, 2022</p> <p>First Demerara well to be drilled by February 12, 2021</p> <p>Second Demerara well to be drilled by February 12, 2023</p>
Gross Acreage	1,875,000
Working Interest in the Blocks	33.333%
Base Royalty Rate	1%

Ecuador: Intracampos Exploration Bid Round

Awarded the Perico and Espejo Blocks (Frontera 50% / GeoPark 50%)

- Four year exploration term with two year extension
- Proven hydrocarbon basin near existing production and infrastructure
- Prospective, low-risk exploration blocks located in Sucumbíos Province in the north-eastern part of Ecuador, in the Oriente basin, and have a total area of approximately 13,504 ha (33,369 acres), of which Frontera holds 6,752 ha net (16,685 acres)
- Both blocks are covered with 3D seismic
- The Oriente basin currently produces more than 500,000 bbl/d

Perico Block

- 7,170 ha (17,700 acres)
- The exploration work commitments include:
 - the drilling of four wells
 - 72 km² of 3D seismic reprocessing
 - 72 km² of magnetometry and gravimetry

Espejo Block

- 6,334 ha (15,650 acres)
- The exploration work commitments include:
 - the drilling of four wells
 - 3D seismic acquisition program of 55 km²
 - 74 km² of 3D seismic reprocessing
 - 63 km² of magnetometry

Hamaca Field (CPE-6)

Large Oil In Place, Reserves, Production Upside

COLOMBIA
Llanos Basin

2018 Reserves Balance (before/after royalties)

- 1P: 21.6/21.6 MMBbl
- 2P: 27.4/27.4 MMBbl
- ~ 190 wells for a 5 MBbl/d and 250 MBbl/d of water plateau

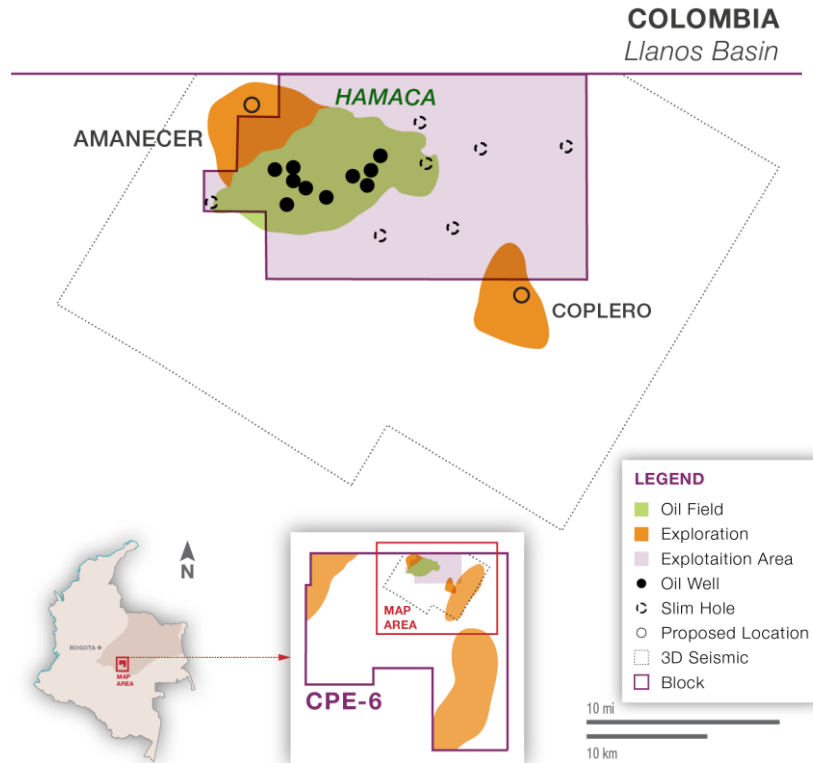

Key 2019 Activities:

- Plan to drill two exploration wells, seven development wells and one injection well

Key Features:

- Potential to grow production following pilot project
- 5 to 8 MBbl/d of oil production potential⁽¹⁾

Contract Name	CPE-6
Contract Type	Exploration and Production
Contract Term Expiry	January 2042
2018 Production (before/after royalties)	940/940 Bbl/d
2018 2P Reserves (before/after royalties)	27.4/27.4 MMBbl
2019 Estimated Capital Expenditures	\$17 MM
Net Acreage	26,700
Working Interest	100%
Base Royalty Rate	6% to 25% ⁽²⁾

(1) Internal estimate. See internal reserves advisories.

(2) Depending on oil price and production.

Peru

Potential for New Contract & Shallow Offshore Exploration

Block 192

- Production back to peak levels of over 10,000 bbl/d following the restart of the NorPeruano pipeline on March 1, 2019
- Current service contract expected to expire at the end of 2019
- Recent change of government - new policies on new contract yet to be established
- 13 producing fields with varying API gravities

Offshore Z-1

- Existing producing fields at Corvina and Albacora in close proximity to Talara Refinery
- Strong pricing - \$1.00 to \$2.00 discount to Brent

Block 192

2018 Net Production	7,393 Bbl/d subject to pipeline availability
Net Acreage	1,266,037
Working Interest ⁽¹⁾	Service Contract
Crude Split (current)	84% FEC, 16% Perupetro
Cumulative Production ⁽²⁾	734 MMBbl
Operator	Frontera

(1) The Company does not hold a working interest in the block. Frontera receives payment in-kind from Perupetro S.A., which ranges from 44% to 84% of production. Frontera currently receives 83% - 84% of production from the block

(2) Cumulative production of the block as of December 31, 2018

Realizing Value from Non-Core Assets

Midstream and Infrastructure Assets Hold Significant Value

1) ODL Pipeline

35.0% Indirect Interest⁽³⁾

- Ships the Company's heavy crude oil from Quifa SW and Cajua fields to Coveñas export terminal via Bicentenario/OCENSA
- 235 km of 24" pipeline
- 340 MBbl/d capacity
- Other major shareholders:
 - ✓ CENIT: 65.0%
 - ✓ IFC: 12.7%⁽²⁾

2) Puerto Bahía

39.2% Indirect Interest⁽¹⁾

- Greenfield liquids import-export terminal with 2.4 MMBbl of storage capacity and a dry terminal for various types of cargo
- Potential near-term value accretion by connecting to refinery and expanding dry dock
- Assessing refinancing opportunities
- Other major shareholders:
 - ✓ IFC: 32.3%⁽²⁾
 - ✓ Blue Pacific: 19.1%

(1) Indirect interest through Infrastructure Ventures Inc.
(2) International Finance Corporation – World Bank Group
(3) Indirect interest through Pacific Midstream Limited

Investment Opportunity

Enhancing the Portfolio

Focused asset base in North Andean Region

96% oil weighted with Brent price exposure

Experienced, technically-focused management team in place

Partner of Choice

Attractive, low-risk “brownfield” development opportunities

Strong balance sheet with targeted quarterly dividend of \$12.5 million with \$25 million initial dividend and 5% NCIB

Improved transportation costs and commitments

Over 90% near-field exploration success in 2018

Appendix

First Quarter 2019 Operational & Financial Highlights

Strong Operating EBITDA and Improving Cost Structure

	Q1 2019	Q4 2018	% Chg.
Production Before Royalties (Boe/d)	67,974	71,924	(5%)
Production After Royalties (Boe/d)	62,893	63,898	(2%)
Net Income (Loss) (\$MM)	\$46	(\$117)	100%
Net Sales (\$MM) ⁽¹⁾	\$293	\$228	29%
Cash Flow from Ops (\$MM)	\$72	(\$3)	100%
Operating EBITDA (\$MM) ⁽¹⁾⁽³⁾	\$145	\$118	22%
Combined Realized Price (\$/Boe) ⁽³⁾	\$57.78	\$54.51	6%
Operating Costs (\$/Boe)	\$11.40	\$12.76	(11%)
Operating Netback (\$/Boe) ⁽¹⁾	\$30.23	\$23.70	28%
Capital Expenditures (\$MM)	\$69	\$156	(56%)
G&A Expenses (\$MM)	\$16	\$22	(27%)

Price / Revenue / Production

Brent oil prices decreased 7% quarter-over-quarter to \$63.83/bbl while realized price increased 6% quarter-over-quarter.

Revenue was \$377.5 million, 42% higher than Q4 2018 and 33% higher than Q1 2018 reflecting higher sales of oil and gas for trading resulting from a third-party transportation agreement during Q1 2019 that was not in place in previous periods.

Production averaged 67,974 boe/d, reflecting the suspension of production from Block 192 in Peru during the quarter.

Colombia production increased 4% compared to Q4 2018 and current production is over 75,000 boe/d, driven by the resumption of production from Block 192 in Peru in March 2019.

Strong Operating EBITDA

Operating EBITDA of \$145 million was 22% higher than Q4 2018 and 68% higher than Q1 2018.

Cost Improvements

G&A of \$16 million in the first quarter of 2019 declined 24% compared to the fourth quarter of 2018 as cost savings initiatives targeted during 2018 successfully materialized.

Capital Expenditures

Capital expenditures of \$69 million during Q1 2019 were 56% lower than Q4 2018 and 12% lower than Q1 2018 driven by the drilling of 31 wells during the quarter as compared to 29 wells and capital relating to the Quifa water handling expansion project in the prior quarter and 36 wells in the first quarter of 2018.

(1) Non-IFRS Measures. See advisories

(2) Includes other revenue and realized losses on risk management contracts

First Quarter 2019

Financial & Operational

Highlights

Net income of \$46 million (\$0.47/share) in Q1 2019 compared to a net loss of \$117 million (\$1.17/share) in Q4 2018 and a net loss of \$3 million (\$0.03/share) in Q1 2018, driven by strong realized prices and lower operating and transportation costs.

Cash provided by operating activities of \$72 million compared to net cash used by operating activities of \$3 million in Q4 2018 and cash provided by operating activities of \$28 million in Q1 2018.

Operating EBITDA of \$145 million was 22% higher than Q4 2018 and 68% higher than Q1 2018

Operating netback during Q1 2019 was \$30.23/boe, 28% higher than in Q4 2018 and 21% higher than in Q1 2018 driven by higher realized prices, and lower production and transportation costs

Current production before royalties is over 75,000 boe/d, as production from Block 192 continues to ramp up following the repair of the NorPeruano pipeline.

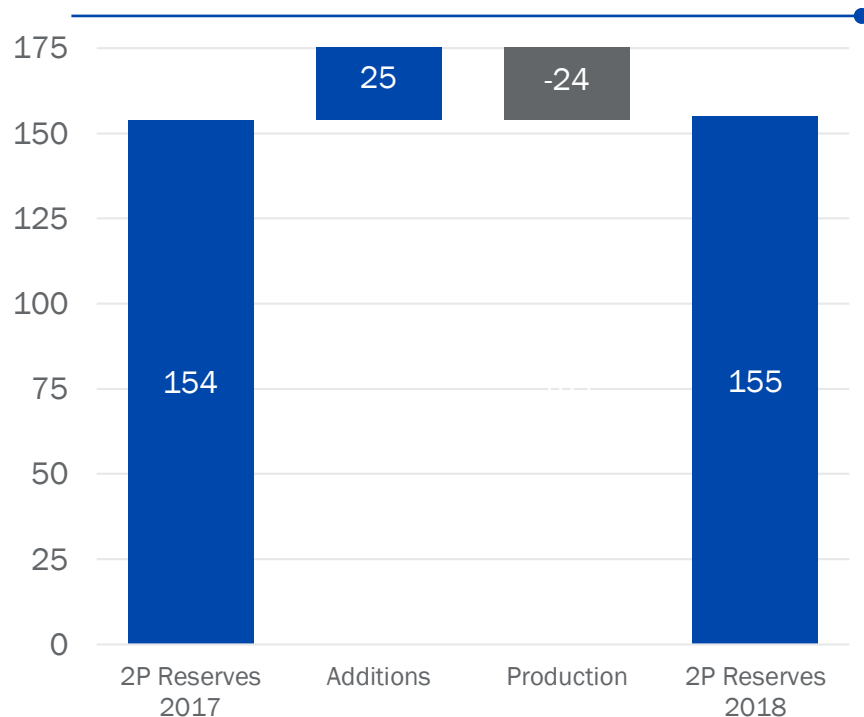

Production from Colombia increased 4% during Q1 2019 compared with Q4 2018, as a result of increased production at the Quifa block following the completion of the water handling expansion project.

Increased light oil production from the Candelilla-7 development well and new development wells from the Coralillo discovery, both on the Guatiquia block.

2018 Reserves Evaluation Results

Replaced 103% of 2018 Production and Strong 2P NPV10 Value

2P Net Reserves - MMBOE

NPV by Category @ 10% (MMUSD)

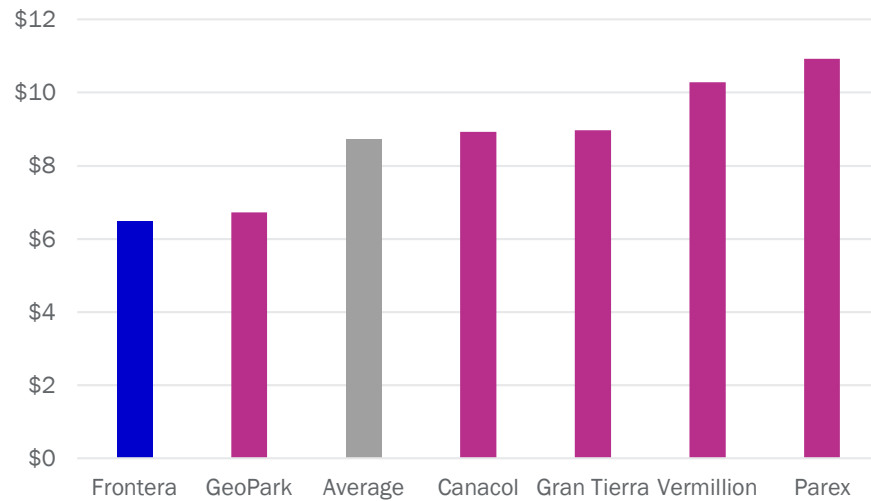

- Replaced 103% of 2018 proved 2P reserves
- Heavy oil represents 62% of proved plus probable reserves, light oil 36% and natural gas 2%
- 68% of 2018 total company 2P reserves are proved
- Reserves additions driven by Quifa CMA project and Guatiquia discoveries

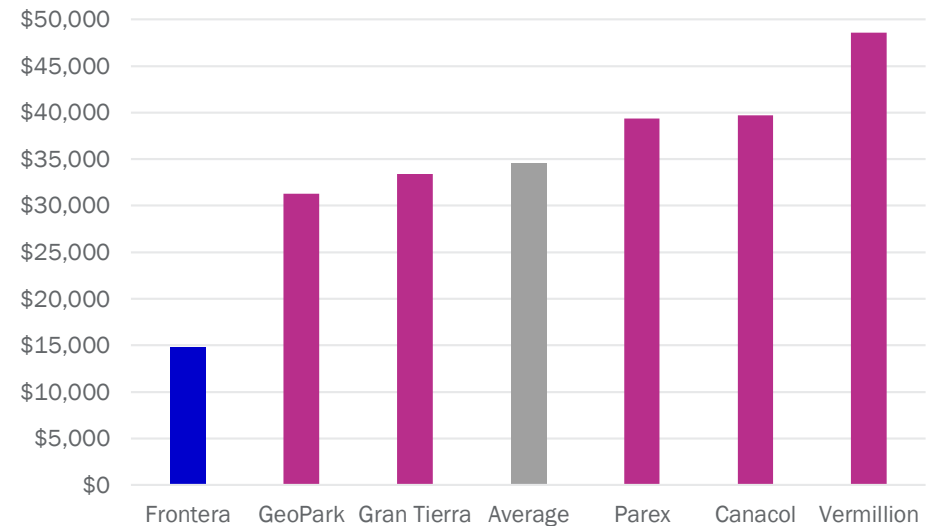

Frontera Offers Deep Value Following Restructuring

Improved Liquidity Driven by Share Buyback and Stock Split
